Risk assessment is an integral part of an institution's risk-based audit and controls for all products, services and activities. Time, new products, regulatory changes, competitive environment changes, and market conditions are just some of the factors that can impact risk assessments. In order for financial institutions to satisfy the regulators, they must constantly evaluate risks, weigh risks against rewards, and make decisions based on these evaluations. Risk Assessments for Financial Institutions is a compilation of all the best tools from our most popular risk and audit manuals; here is a reliable resource that you can trust to save you time, make your organization safer, and make your job easier. Updated regularly, there are now risk assessments for such topics as social media, liquidity management, cloud computing, asset management for trusts, and remote deposit capture. The risk assessments specify risks based on specific rating systems in the following areas: • Mobile Banking • Remote Deposit Capture • Information Security • Information Technology • Business Continuity • Electronic Banking • Compliance • Audit • Lending • Finance and Accounting • Enterprise Risk Management • BSA/AML

Written by experienced experts from both the private and the government sector, *The Story of Payments: How The Industrialization of Trust Created the Modern Payment System* tells the story of how payments - between people, merchants, employers and governments - emerged from the ancient system of barter and grew, through various technological implementations ranging from coins and paper money to checks, wire transfers and credit cards to today's entirely electronic local and international payment systems. Readers will learn the inner workings of the U.S. Payments System that allow it to work effectively and efficiently, including the technology, standards, laws and regulations that provide ubiquity and ease of access. The authors also provide insight into the inherent risks of the payment system and set forth a model for future innovation and change. *The Story of Payments: How The Industrialization of Trust Created the Modern Payment System* is a practical manual for those who make and receive payments, an instructional manual for those who work in payments, and a fascinating historical exploration of the role the world's payment systems have played in creating the commercial society we live in today.

Who is responsible for ensuring appropriate resources (time, people and money) are allocated to Blockchain-Based ACH Payments? What threat is Blockchain-Based ACH Payments addressing?
