Anatomy of Seed Plants. #OTD
On this day in 1997, the
great plant anatomist
extraordinaire Katherine
Esau died. Her early work
was dedicated to forming the
curly top virus in beets and
other plants. I found an
early newspaper account of
her work in the Woodland
Daily Democrat from 1928;
the headline was "Girl to
Conduct Beet Experiments."
She was best known for her
research on the effects of
viruses on plant tissues.
