The news is everywhere. We can ' t stop constantly checking it on our computer screens, but what is this doing to our minds? We are never really taught how to make sense of the torrent of news we face every day, writes Alain de Botton (author of the best-selling *The Architecture of Happiness*), but this has a huge impact on our sense of what matters and of how we should lead our lives. In his dazzling new book, de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview and a political scandal—and submits them to unusually intense analysis with a view to helping us navigate our news-soaked age. He raises such questions as *Why are disaster stories often so uplifting? What makes the love lives of celebrities so interesting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring?* In *The News: A User ' s Manual*, de Botton has written the ultimate guide for our frenzied era, certain to bring calm, understanding and a measure of sanity to our daily (perhaps even hourly) interactions with the news machine. (With black-and-white illustrations throughout.)

A masterpiece ahead of its time, a prescient rendering of a dark future, and the inspiration for the blockbuster film *Blade Runner* By 2021, the World War has killed millions, driving entire species into extinction and sending mankind off-planet. Those who remain covet any living creature, and for people who can ' t afford one, companies built incredibly realistic simulacra: horses, birds, cats, sheep. They ' ve even built humans. Immigrants to Mars receive androids so sophisticated they are indistinguishable from true men or women. Fearful of the havoc these artificial humans can wreak, the government bans them from Earth. Driven into hiding,

**INSTANT NEW YORK TIMES BESTSELLER** From the New York Times bestselling author of *I’m Judging You*, a hilarious and transformational book about how to tackle fear--that everlasting hater--and audaciously step into lives, careers, and legacies that go beyond even our wildest dreams Luvvie Ajayi Jones is known for her trademark wit, warmth, and perpetual truth-telling. But even she’s been challenged by the enemy of progress known as fear. She was once afraid to call herself a writer, and nearly skipped out on doing a TED talk that changed her life because of imposter syndrome. As she shares in *Professional Troublemaker*, she’s not alone. We’re all afraid. We’re afraid of asking for what we want because we’re afraid of hearing “no.” We’re afraid of being different, of being too much or not enough. We’re afraid of leaving behind the known for the unknown. But in order to do the things that will truly, meaningfully change our lives, we have to become professional troublemakers: people who are committed to not letting fear talk them out of the things they need to do or say to live free. With humor and honesty, and guided by the influence of her professional troublemaking Nigerian grandmother, Funmilayo Faloyin, Luvvie walks us through what we must get right within ourselves before we can do the things that scare us; how to use our voice for a greater good; and how to put movement to the voice we’ve been silencing--because truth-telling is a muscle. The point is not to be fearless, but to know we are afraid and charge forward regardless. It is to recognize that the things we must do are more significant than our fears. This book is about how to live boldly in spite of all the reasons we have to cower. Let’s go!

For thousands of years, the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another. Indeed, the faithful often view converting others as an obligation of their faith—and are trained from an early age to spread their unique brand of religion. The result is a world broken in large part by unquestioned faith. As an urgently needed counter to this tried-and-true tradition of religious evangelism, *A Manual for Creating Atheists* offers the first-ever guide not for talking people into faith—but for talking them out of it. Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality, cast doubt on their religious beliefs, mistrust their faith, abandon superstition and irrationality, and ultimately embrace reason.

"The official style guide used by the writers and editors of the world's most authoritative news organization."

*How to be Human* is the only manual you need to help you upgrade your mind as much as you've upgraded your iPhone. 'With this marvellous book, Ruby Wax has confirmed her position as one of the most readable, inspirational and engaging writers in the field of human mental health, happiness and fulfilment.' Stephen Fry "It took us 4 billion years to evolve to where we are now - completely brilliant and yet, some might say, emotionally dwarfed. The question is: can our more empathetic side catch up in time to save us and the world? I've got nothing against smarts, but it's smarts without emotional awareness that got us into this position of being able to nuke each other into oblivion and rape the earth for oil." With a little help from a monk (who tells us how our mind works) and a neuroscientist (who tells us how our brain works), Ruby Wax answers every question you've ever had about: evolution, thoughts, emotions, the body, addictions, relationships, sex, kids, the future and compassion. Filled with witty anecdotes from Ruby's own life, and backed up by smart science and practical mindfulness exercises, *How to be Human* is the only manual you need to help you upgrade your mind as much as you've upgraded your iPhone. 'Ruby has beautifully fused neurology and spirituality and given us a means to cope with operating both a mind and a brain. If this mental upgrade works then all other books will become defunct as we repose in bliss.' Russell Brand 'How to Be Human is, without exaggeration, a lifeline; wise, practical and funny, it is a handbook for those in despair. It is actually for everyone alive, for the curious, or disillusioned or muddled or just plain happy.' Joanna Lumley
