Azienda significa, em italiano, "fazenda" ou "empresa". Talvez seja este o primeiro jargão e conceito que o estudante da área contábil aprende: "contabilidade é a ciência que estuda o patrimônio à disposição das empresas". "Fazenda" é oriundo do latim vulgar português fazenda, "coisas que devem ser feitas". [2]

This volume investigates cultural migrants: people who, from their own free will, move to another country because of their interest in the target language and culture. Chapters include studies on cultural migrants acquiring French, Italian, Spanish and English and consider linguistic, psycholinguistic, sociolinguistic and pragmatic aspects of language acquisition. Cultural migrants have social and psychological advantages when acquiring a second language as adults, and the study of their linguistic knowledge and production increases our understanding of the possibilities and limits of L2 ultimate attainment. The work thus fills a gap in our understanding of high-level proficiency and will be of interest to researchers working in the field of SLA, as well as to social scientists studying the relationship between language, culture and integration.

is a great resource anywhere you go; it is an easy tool that has just the words completed description you want and need! The entire dictionary is an alphabetical list of English words with their full description plus special Alphabet, Irregular Verbs and Parts of speech. Il significato delle parole che imparerai ti aiuterà in ogni situazione nel palmo della tua mano.

This book focuses on entomovectoring, also known as apivectoring, the method used for managing pollinators to increase crop yields and employ strategies of biocontrol in greenhouses and open fields. It is written by experts working in academia and industry from the different continents of the world. Over the past 25 years Research and Development has successfully investigated the potential of pollinators to perform two tasks: dispersal of biological control agents (BCAs) and their pollination service. This book provides a basic overview of the current literature on the different aspects and factors of this novel technology. It explains and presents practical cases of enhancing pollination coupled with the suppression of plant pathogens and pests under various agricultural production practices from greenhouse to open field conditions and crops ranging from orchard fruits, to small and tender berries, vegetables and oil seeds

This book addresses the nexus of issues exploring governance structures and mechanisms in public service organizations, thus contributing to the development of disciplines that focus on public management. It goes beyond the state of the art by addressing a number of specific issues in a more systematic fashion. The book's interdisciplinary focus is a particularly valuable asset, as its topic is situated at the crossroads of a number of fields, including public management, business administration, corporate governance, policy studies, political science, sociology, and third sector studies, all of which offer important perspectives and are important for the development of public management and public services. The book covers more than Italy and Norway and focuses specifically on public service organizations, addressing more aspects of their governance structures and mechanisms than any other book available today. The unique presentation of features related to the governance and management of different actors (state-owned enterprises, local public utilities, ministries, municipalities, citizens, etc.), involved at different levels in the production and provision of public services, makes it possible to compare and contrast these different perspectives and opens new avenues of theoretical collaboration and development.
