Being a writer can mean navigating a lonely and confusing path. Bad Choices can help make the road a little easier. Is this a craft book? Encouragement and support for those who are stuck or feeling as though they don't have what it takes? A meditation on why write in the first place? Yes to all of those things. Bad Choices Make Good Stories is a collection of essays about craft, revision, and the community and struggles that go along with the writing life. Author Erin Dionne has taught writing for over two decades, has published seven novels and two picture books, and shares her experience--peppered with a healthy dose of humor--with readers in this honest and funny collection.

This book is about all the ways that I, and millions of people with autism, experience the world. When I was in high school, I attended a seminar for people with Asperger's. There was another individual there (pretty safe bet he was on the spectrum) who raised his hand and repeated the cliché "there's no normal." He said, "We're all different! We're all weird in our own way! So, there really is no such thing as normal." I raised my hand and said, "You know what? That's bullsh\*t. There is such thing as normal! The difference between us and everybody else is that they all have quirks that fall within the range of what society considers normal, and we fall outside that range." I almost felt bad, because he didn't have much to say after that. I encourage you to read our first book, Chasing the Rabbit, because it will give you a very different perspective on my life, as it's mostly written from my dad's point of view. The first book I wrote (with my dad) was Chasing the Rabbit: A Dad's Life Raising a Son on the Spectrum. My dad chose that title--he always describes me with the analogy of a greyhound chasing a mechanical rabbit: the greyhound can see the rabbit but can never catch it. My dad says that the rabbit represents normal, and I'm the greyhound. As someone with Asperger's--what's now called "high-functioning autism"--I am always trying to be "normal." I know what "normal" is, and I know what "normal" looks like, but I am perpetually trying to catch the rabbit, which is "normality." A lot of people have an issue with the term "normal." I don't. When people say things like, "There's no such thing as normal," it devalues the struggle I go through every day.

A raw, uncensored and brutally honest glimpse into the crazy lives of drug addicts. Shocking, heart-breaking and mesmerizing. Once you start reading, you won't be able to stop. The strange true story of a writer who falls in love with one of his readers and meets his future wife on Goodreads. Dear Reader, You're a little late to the party. Where the hell have you been? This is already the third and final part of the trilogy, and you're only joining us now? Tsk tsk tsk. Let me get you up to speed on what you've missed so far: In book one, Going to New York, you missed the utterly fascinating, nay spellbinding saga of me growing up in Germany and later emigrating to New York. I was a brooding, troubled teenage hacker. Wow! Good stuff! It's almost like my life was the perfect kind of crazy to make a really awesome book! Anyway, being a teenage hacker came in handy later in life. I went from rags to riches thanks to my keen understanding of technology and how to use the web to my advantage. In New York I was married to Donna, a girl I had met online. She was an agoraphobic, prone to temper tantrums. And fun was had by all, which led to a divorce 16 years later. That's where the story gets really interesting. I began dating. It didn't go well. I was no good at it. OK, truth be told, I was really bad at it. Apparently I had terrible taste in women. A heroin-addicted hooker named Alice broke my heart and robbed me of my will to live. Doesn't sound very fun, does it? But it's a fun read, I promise. Dark, but fun. Mesmerizing even! Brokenhearted, I moved from New York to Florida. That's where the first book ends. The second book you missed (I'm not mad at you. I'm just disappointed.) is called The Heroin Scene in Fort Myers, which is a very fitting title, believe you me. Sometimes I'm a slow learner, so I dated my way through the heroin scene in Florida, and I couldn't figure out for years why I wasn't finding any wife material. But oh how I tried. And tried. In all the wrong places. Pretty sad. I'm not proud of it. After years of sad pathetic sex with heroin addicts I was a wreck. My younger self wouldn't have even recognized me. Lucy and Veronica had turned me into a broken, humiliated shell of a man. My heart had been ripped out of my chest so many times, it was a miracle I hadn't killed myself yet. (Seriously, it's a fun read. I promise!) At the end of the book I had it up to here with heroin addicts. I told myself never again would I let myself be sucked in by the sweet lies of manipulative, fake love. The name of the final chapter was NO MO HO. No more whores. I needed to change my life before my life was going to kill me. I hopped on a plane, back to my native Germany, to lick my wounds and heal before returning to America. That's where the second book ended. And now, for our third and final act...

In *10 Bad Choices That Ruin Black Women's Lives*, relationship expert Dr. Grace Cornish writes a lively, practical, provocative guide for black women everywhere who want to shed the duds and find the studs who will treat them with respect. According to Dr. Cornish, six out of every ten black women are either in bad relationships, share a man, or are celibate. The problem is not the women themselves but the bad choices they keep making. In her frank and refreshing new book, Dr. Cornish speaks to unique aspects of the African American female psyche by targeting ten of the most common and foolish choices black women make in their lives regarding men, and how they can correct these problems, including: Sisters Dissin' Sisters No Money, No Honey Exchanging "Sexual Dealings" for Loving Feelings Loving the "Married Bachelor" Emotional Dependency Plus Unplanned Pregnancy . . . and much more. Relying on case studies, interviews, and letters she has received, Dr. Cornish gets to the heart of the matter by illuminating why black women, no matter how smart, savvy, and successful, continue to lose at the dating game, and how they can face, erase, and replace the problems that have kept them from finding true love. Why are so many black women alone or in bad relationships? Why do sisters unconsciously use weight, fear, finance, status, skin color, and other barriers to keep themselves from getting the love they want? Why do black women think that there are no eligible black men left--that the good ones are married, dead, or not yet born, and the rest are gay, bisexual, or interested only in white women?

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In *Decisive*, Chip Heath and Dan Heath, the bestselling authors of *Made to Stick* and *Switch*, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In *Decisive*, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.
