What is Benchmarking? Technical & Competitive Benchmarking ...

Benchmarking is a process where you measure your company's success against other similar companies to discover if there is a gap in performance that can be closed by improving your performance. Studying other companies can highlight what it takes to enhance your company's efficiency and become a bigger player in your industry.

What Is Benchmarking? Definition, Examples and Meaning ...

Benchmarking is one of a manager's best tools for determining whether the company is performing particular functions and activities efficiently, whether its costs are in line with those of competitors, and whether its internal activities and business processes need improvement.

Benchmarking - strategy, organization, system, manager ...

Benchmarking is a way of discovering what is the best performance being achieved – whether in a particular company, by a competitor or by an entirely different industry. This information can then be used to identify gaps in an organization's processes in order to achieve a competitive advantage.

Understanding the Purpose and Use of Benchmarking

Benchmarking is commonly used to compare customer satisfaction, costs and quality. KPIs, on the other hand, are decision-making and monitoring tools, used to track performance in relation to strategic goals. In other words, KPIs chart whether an individual, project, team, business unit or entire company is on track to achieve its objectives.
