New Technology and Education explores the benefits and dangers of the increasing use of technology in education, drawing on different cultural perspectives from across the globe to consider a variety of viewpoints. The reader is encouraged to engage with each facet of the debate considering the philosophical, psychological and sociological implications of the relationship between technology and education. Recent debates and developments are considered, including: • What is the relationship between creativity, education and new technology? • Are subject boundaries blurred by the use of new technologies? • How do we plan for technologies becoming redundant? Reflective exercises, interviews, chapter summaries and useful websites encourage and support student learning and the application of new concepts.

The Royal Marsden is the world's first hospital dedicated to cancer diagnosis, treatment, research and education – a centre of excellence with an international reputation for ground-breaking research and pioneering the very latest in cancer treatments and technologies, as well as specialising in cancer diagnosis and education. This companion volume to the internationally successful The Royal Marsden Manual of Clinical Nursing Procedures is designed to support practitioners who work specifically with oncology patients by providing detailed evidence-based procedures and rationale, and problem-solving guidance on all aspects of oncology nursing. The Royal Marsden Manual of Cancer Nursing Procedures: Is organized and structured to represent the needs of the patient along their care pathway Provides the latest evidence underpinning all procedures Includes information on haematological procedures; pain assessment and management; wound care; oncological emergencies; and end-of-life care Gives detailed guidelines on supporting patients living with cancer with practical information on such things as benefits, exercise and nutrition. The Royal Marsden Manual of Cancer Nursing Procedures is an invaluable, definitive resource for all those involved in the provision of cancer care and support to patients and their families.

Fertility Awareness is key to understanding sexual and reproductive health at all life stages. It can be used to either plan or avoid pregnancy. Fertility Awareness Methods (FAMs) are highly effective when motivated couples are taught by trained practitioners. These methods are in demand for ecological, medical, cultural, religious and moral reasons. The ability to control fertility naturally is a lifestyle choice. The Complete Guide to Fertility Awareness provides the science and methodology suitable for health professionals and a general audience. It covers reproductive physiology and the fertility indicators: temperature, cervical secretions and cycle length calculations. It explores ways to optimise conception and to manage conception delays. Case studies and self-assessment exercises are included throughout. The book addresses the scientific credibility of new technologies including fertility apps, home test kits, monitors and devices. The Complete Guide to Fertility Awareness offers: evidence-based information for general practitioners, practice nurses, school nurses, midwives, sexual health doctors and nurses a unique perspective on subfertility for gynaecologists and fertility nurses an authoritative source of reference for medical, nursing and midwifery students a straightforward and practical reference for new and experienced FAM users the core text for the FertilityUK Advanced Skills Course in Fertility Awareness

This volume contains 17 peer-reviewed papers based on the presentations at the 9th Annual International Workshop on Bioinformatics and Systems Biology (IBSB 2009) held at the Life Science Engineering Building of Boston University from July 27 to 29, 2009. This workshop started in 2001 as a platform for doctoral students and young researchers to present and discuss their research results and approaches in bioinformatics and systems biology. It is part of a collaborative educational program involving leading institutions and leaders committed to the following institutions and programs: • Boston University Graduate Program in Bioinformatics • Charit Universitätsmedizin Berlin • Freie Universität Berlin • Global COE Program Center of Education and Research for Advanced Genome-Based Medicine, University of Tokyo • The International Research Training Group (IRTG) Genomics and Systems Biology of Molecular Networks • International Research and Training Program on Bioinformatics and Systems Biology, Kyoto University Bioinformatics Center • Max-Delbrck Center for Molecular Medicine in Berlin • Max Planck Institute for Molecular Genetics in Berlin • Max Planck Institute of Molecular Plant Physiology in Potsdam
