The N52 engine was world-renowned for its more advanced technology and engineering over previous BMW models. Despite its highly reviewed performance capabilities, the N52 engine began displaying some noticeable symptoms of malfunction. Drivers began detecting rattling or ticking noises at specific times on the road.

N52 Lifter Tick Causes and Solutions - BMW Repair, Service ...

The N52 engine is no longer used in BMW vehicles because of a few glitches that drivers began to notice, including the infamous lifter ticking noise. This ticking noise commonly occurs while the car is in-transit in particularly colder temperatures or after a series of stop-and-go trips around town.

How to Avoid the Lifter Ticking Noise in Your BMW ...

Although BMW's N52 engine is still one of the most well known designs in automotive history, it's not all for the greatest reasons. Lifter ticking in these engines is highly common – especially past a certain mileage. The ticking lifter in the N52 engine is a nuisance, and can be difficult to address without the proper expertise. Here's what you should know about lifter ticking in these engines and what you can do to address the issue effectively.

Causes of Lifter Ticking in BMW

After a while, BMW drivers were noticing that the engine became noisy under certain conditions, producing an annoying and concerning "ticking" sound. Most BMWs manufactured between the years of 2004-2015 were equipped with the N52 engine, and unfortunately the level of care the driver put into the car had no effect on whether the ticking issue arose or not.

What is Lifter Ticking in a BMW? - Das European Autohaus

#2 Hydraulic Valve Adjuster problems The ticking noise of Hydraulic Valve Adjuster is a known problem with the N52 (3.0L) engine fitted with manufacturing date prior to November 2008.
