board review and preparation. Up-to-date subspecialty chapters provide concise overviews with bulleted lists, tables, photographs, and radiographs, as well as new multiple-choice questions with detailed rationales. Board simulation chapters in every section and at the end of the book, along with three practice exams, build your test-taking skills.

Users will build confidence and reduce anxiety as they prepare for the American Board of Pediatrics certification and recertification exams. Written primarily by distinguished Cleveland Clinic faculty, this detailed and practical review is organized into subspecialty sections, each concluding with a board simulation chapter to build users' test-taking skills. Numerous bulleted lists, tables, and illustrations improve retention of essential facts. Two practice board exams at the end of the book provide opportunities for self-assessment. Convenient companion website offers the fully searchable text, an image bank, and 100 online-only questions with answers. The Fourth Edition includes new board simulation in sports medicine, detailed rationales for each response, and self-assessment features in all board simulation chapters that let users evaluate their strengths and weaknesses. This is the tablet version which does not include access to the supplemental content mentioned in the text.

Packed with the information, examples and problems you need to learn to think like a chemist, CHEMISTRY: AN ATOMS FIRST APPROACH, Third Edition is designed to help you become an independent problem-solver. The text begins with coverage of the atom and proceeds through the concept of molecules, structure and bonding. This approach, different from your high school course, will help you become an adept critical thinker and a strong problem-solver -- skills that will be useful to you in any career. Respiratory Care Cardiopulmonary Anatomy and Physiology is a comprehensive, highly illustrated text with a strong emphasis on cardiovascular and pulmonary physiology, acid/base balance, and blood gas interpretation.

This fully updated Ninth Edition of Steven and Susan Zumdahl's CHEMISTRY brings together the solid pedagogy, easy-to-use media, and interactive exercises that today's instructors need for their general chemistry course. Rather than focusing on rote memorization, CHEMISTRY uses a thoughtful approach built on problem-solving. For the Ninth Edition, the authors have added a new emphasis on critical systematic problem solving, new critical thinking questions, and new computer-

based interactive examples to help students learn how to approach and solve chemical problems--to learn to think like chemists--so that they can apply the process of problem solving to all aspects of their lives. Students are provided with the tools to become critical thinkers: to ask questions, to apply rules and develop models, and to evaluate the outcome. In addition, Steven and Susan Zumdahl crafted ChemWork, an online program included in OWL Online Web Learning to support their approach, much as an instructor would offer support during office hours. ChemWork is just one of many study aids available with CHEMISTRY that supports the hallmarks of the textbook--a strong emphasis on models, real world applications, visual learning, and independent problem solving. In the highly specialized field of caring for children in the PICU, Fuhrman and Zimmerman's Pediatric Critical Care is the definitive reference for all members of the pediatric intensive care team. Drs. Jerry J. Zimmerman and Alexandre T. Rotta, along with an expert team of editors and contributors from around the world, have carefully updated the 6th Edition of this highly regarded text to bring you the most authoritative and useful information on today's pediatric critical care--everything from basic science to clinical applications. Contains highly readable, concise chapters with hundreds of useful photos, diagrams, algorithms, and clinical pearls. Uses a clear, logical, organ-system approach that allows you to focus on the development, function, and treatment of a wide range of disease entities. Features more international authors and expanded coverage of global topics including pandemics, sepsis treatment in underserved communities, specific global health concerns by region. Covers current trends in sepsis-related mortality and acute care after sepsis, as well as new device applications for pediatric patients.
