In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

Patricia Volk's delicious memoir lets us into her big, crazy, loving, cheerful, infuriating and wonderful family, where you're never just hungry-your starving to death, and you're never just full-you're stuffed. Volk's family fed New York City for one hundred years, from 1888 when her great-grandfather introduced pastrami to America until 1988, when her father closed his garment center restaurant. All along, food was pretty much at the center of their lives. But as seductively as Volk evokes the food, Stuffed is at heart a paeen to her quirky, vibrant relatives: her grandmother with the "best legs in Atlantic City"; her grandfather, who invented the wrecking ball; her larger-than-life father, who sculpted snow thrones when other dads were struggling with snowmen. Writing with great freshness and humor, Patricia Volk will leave you hungering to sit down to dinner with her robust family-both for the spectacle and for the food.

How senior leaders can re-connect to the emerging leaders hidden intheir organizations A sea change has taken place throughout the culture ofleadership; today's emerging leaders are "opting out" of thesame positions their predecessors coveted in years past. But many senior managers trained in traditional leadership

still hang onto outdated approaches of command and control despite how much they've heard about "empowerment" and inclusion. At the core of this book is the fictional suspense story of Brookreme Corporation, whose leaders are challenged to chart a course to a global future, navigating relational land mines along the way. With both story telling and hard research, Leadership Divided reconnects generations and instructs both senior and emerging leaders on how the relationships of the future will be the path to revolutionary performance. Ron A. Carucci (Seattle, WA) is a founding partner with Passages Consulting, LLC, where he works with CEOs and senior executives in pursuit of profound organizational change and executive leadership capability. He is Graduate Professor of Leadership at Mars Hill Graduate School in Seattle. He is also faculty member at Fordham University, serving as Associate Professor of Organizational Behavior, and has served as an adjunct at the Center for Creative Leadership. His clients have included Edward Jones Investments, Bristol-Myers Squibb, Amgen, McDonald's, PepsiCo, Gates Corporation, Accenture, and many others.

The world's second-wealthiest country, Japan once seemed poised to overtake America. But its failure to recover from the economic collapse of the early 1990s was unprecedented, and today it confronts an array of disturbing social trends. Japan has the highest suicide rate and lowest birthrate of all industrialized countries, and a rising incidence of untreated cases of depression. Equally as troubling are the more than one million young men who shut themselves in their rooms, withdrawing from society, and the growing numbers of "parasite singles," the name given to single women who refuse to leave home, marry, or bear children. In Shutting Out the Sun, Michael Zielenziger argues that Japan's rigid, tradition-steeped society, its aversion to change, and its distrust of individuality and the expression of self are stifling economic revival, political reform, and social evolution. Giving a human face to the country's malaise, Zielenziger explains how these constraints have driven intelligent, creative young men to become modern-day hermits. At the same time, young women, better educated than their mothers and earning high salaries, are rejecting the traditional path to marriage and motherhood, preferring to spend their money on luxury goods and travel. Smart, unconventional, and politically controversial, Shutting Out the Sun is a bold explanation of Japan's stagnation and its implications for the rest of the world.

"Makes a provocative case that you should put customers second, close open offices, and ditch performance appraisals."—Adam Grant, best-selling author of Originals "Under New Management is a lively, provocative must-read."—Whitney Johnson, author of Disrupt Yourself. Why accepted management practices don't work—and how innovative companies are changing the rules Should your employees know each other's salaries? Is your vacation policy harming productivity? Does your hiring process undermine your team? David Burkus argues that the traditional management playbook is full of outdated, counterproductive practices, and he reveals how the alternative management revolution has already started at companies like Netflix, Zappos, Google, and others. Burkus investigates behind their office doors to show how these companies are reevaluating and reinventing the most basic management principles, like hiring, firing, vacation policy, and even office floor plan, and enhancing their business's success as a result. "Is your company ready for a radical departure from twentieth-century management standards? David Burkus has collected the stories of dozens of companies that are standing the old rules on their heads. Even better, Burkus shows how you can do it, too."—Daniel H. Pink, best-selling author of Drive and To Sell Is Human "If you are going to read one book on being a better manager in the next year, start here. David Burkus has assembled the most practical research and provocative ideas into an incredibly quick read."—Tom Rath, best-selling author of StrengthsFinder 2.0
