Deutz oil cooled engine problems - The Farming Forum

Deutz BF4M1012C Hi I am having problems with the above engine in a screener. the engine will not start without aero/easy start. hot or cold. it seems as if the engine is not getting fuel until the revs on the engine are right up then it begins to run itself. there is no sign of diesel smoke coming out the exhaust at all when turning over. i have replaced all fuel pipes, lift pump and filter but wondering now if it could be something electrical. your help would be much appreciated
