Earth Abides is perhaps the best of the past three books in this series. It takes what has been built since the first novel so long ago and leaves it all in a place that is satisfying as a conclusion to all before, yet leaves me on the edge of my seat for some things that can come from this all.

Returning from a field trip, Isherwood Williams discovers that a mysterious plague has destroyed human civilization during his absence and makes his way to San Francisco, where he finds a few survivors who build a small community, living like their pioneer ancestors. Reprint. 20,000 first printing.

First published in 1949, award-winning Earth Abides is one of the most influential science-fiction novels of the twentieth century. It remains a fresh, provocative story of apocalyptic pandemic, societal collapse, and rebirth. The cabin had always been a special retreat for Isherwood Williams, a haven from the demands of society. But one day while hiking, Ish was bitten by a rattlesnake, and the solitude he had so desired took on dire new significance. He was sick for days—and often delirious—waking up to find two strangers peering in at him from the cabin door. Yet oddly, instead of offering help, the two ran off as if terrified. Not long after, the coughing began. Ish suffered chills and fever, and a measles-like rash on his skin. He was one of the few people in the world to live through that peculiar malady, but he didn't know it then. Ish headed home when he finally felt himself again—and noticed the strangeness almost immediately. No cars passed him on the road; the gas station not far from his cabin looked abandoned; and he was shocked to see the body of a man on the roadside near a small town. Without a radio or phone, Ish had no idea of humanity's abrupt demise. He had escaped death, yet could not escape the catastrophe—and with an eerie detachment he found himself curious as to how long it would be before all traces of civilization faded from Earth.

In this profound ecological fable, a mysterious plague has destroyed the vast majority of the human race. Isherwood Williams, one of the few survivors, returns from a wilderness field trip to discover that civilization has vanished during his absence. Eventually he returns to San Francisco and encounters a female survivor who becomes his wife. Around them and their children a small community develops, living like their pioneer ancestors, but rebuilding civilization is beyond their resources, and gradually they return to a simpler way of life. A poignant novel about finding a new normal after the upheaval of a global crisis.

Best known for his 1949 post-apocalyptic thriller Earth Abides, George R. Stewart (1895-1980) spent a lifetime wandering the American landscape and writing books about its geography and history. An English professor at the University of California at Berkeley, the exceptional scholar-author penned some of the most remarkable literary works of the 20th century, inventing several types of books along the way--including the road-geography book, micro-history, micro-novel, place-name history, ecological history, and the ecological novel. By weaving human and natural sciences and history into his books Stewart created works with a multi-disciplinary perspective on events and places that influenced numerous other writers, artists, and scientists, including Stephen King, Greg Bear, and Page Stegner. This volume considers George R. Stewart's rich oeuvre while chronicling a life-long quest to uncover the deepest truths about the man and his work.

Only one thing could unite a land wracked with such mistrust. But can it be found? Or is the Jugom Ark merely a legend? 'Rivals the Lord of the Rings with its sense of scale and grandeur' - Ian Brodie, author of the Lord of the Rings Location Guidebook

"Compulsive reading—a wonderful account, both scholarly and gripping, of a horrifying episode in the history of the west." —Arthur M. Schlesinger Jr. The tragedy of the Donner party constitutes one of the most amazing stories of the American West. In 1846 eighty-seven people—men, women, and children—set out for California, persuaded to attempt a new overland route. After struggling across the desert, losing many oxen, and nearly dying of thirst, they reached the very summit of the Sierras, only to be trapped by blinding snow and bitter storms. Many perished; some survived by resorting to cannibalism; all were subjected to unbearable suffering. Incorporating the diaries of the survivors and other contemporary documents, George Stewart wrote the definitive history of that ill-fated band of pioneers; an astonishing account of what human beings may endure and achieve in the final press of circumstance.
