Economic Development , 10/e is the leading textbook in this field, providing a complete and balanced introduction to the requisite theory, the driving policy issues, and the latest research. Principles and Concepts: Economics, Institutions, and Development: A Global Perspective; Comparative Economic Development; Classic Theories of Economic Growth and Development; Contemporary Models of Development and Underdevelopment. Problems and Policies: Domestic: Poverty, Inequality, and Development; Population Growth and Economic Development: Causes, Consequences, Controversies; Urbanization and Rural-Urban Migration: Theory and Policy; Human Capital: Education and Health in Economic Development; Agricultural Transformation and Rural Development; The Environment and Development; Development Policymaking and the Roles of Market, State, and Civil Society. Problems and Policies: International and Macro: International Trade Theory and Development Strategy; Balance of Payments, Developing-Country Debt, and Issues in Macroeconomic Stabilization; Foreign Finance, Investment, and Aid: Controversies and Opportunities; Finance and Fiscal Policy for Development; Some Critical Issues for the Twenty-First Century. For all readers interested in economic development.

For courses on economic development A complete, balanced introduction to the theory, issues, and latest research. Economic Development, Twelfth Edition--the leading textbook in this field--provides students with a complete and balanced introduction to the requisite theory, driving policy issues, and latest research. Todaro and Smith take a policy-oriented approach, presenting economic theory in the context of critical policy debates and country-specific case studies so you can see how theory relates to the problems and prospects of developing countries. Teaching and Learning Experiences This program presents a better teaching and learning experience-for you and your students. Use the text's Hallmark Approach to presenting engaging information: Shaped by the authors' personalities, this approach is backed up with extensive research and travel to provide the best data possible. Teach with strong pedagogy tools: The text reinforces central key concepts by presenting a clear learning path for students. Give students a real-world global perspective: Students are able to gain a unique perspective about world issues from two authors who strive to address different sides to problems.

This classic, bestselling textbook provides a comprehensive introduction to the field of development economics. The tenth edition of Tony Thirlwall ' s book, now co-written with Penélope Pacheco-López, provides a clear, comprehensive and rigorous introduction to the theory of development economics and the experience of developing countries. Balancing a historic approach with current data and references, it provides a wide-ranging analysis of the subject. This all-inclusive methodology succeeds at representing different schools of thought with a balance of micro and macro topics. An ideal textbook for undergraduate students of economics and other social sciences, it is also suitable for upper undergraduate and master's level modules on development economics as an option on a non-economics degree.

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.

The book is orientated towards the teaching of economics within the context of the major problems of development and underdevelopment in Third World nations and fills a major void in the teaching materials available for this purpose. It has been written for use by first-year economic students at universities throughout Africa, Asia, Latin America and the Middle East.

Over 800 million people suffer from chronic hunger, and over ten million children die each year from preventable causes. These may seem like overwhelming statistics, but as Stephen Smith shows in this call to arms, global poverty is something that we can and should solve within our lifetimes. Ending Global Poverty explores the various traps that keep people mired in poverty, traps like poor nutrition, illiteracy, lack of access to health care, and others and presents eight keys to escaping these traps. Smith gives readers the tools they need to help people overcome poverty and to determine what approaches are most effective in fighting it. For example, celebrities in commercials who encourage viewers to "adopt" a poor child really seem to care, but will sending money to these organizations do the most good? Smith explains how to make an informed decision. Grass-roots programs and organizations are helping people gain the capabilities they need to escape from poverty and this book highlights many of the most promising of these strategies in some of the poorest countries in the world, explaining what they do and what makes them effective.

This collection of Todaro's essays focuses on a wide range of topics in economic development, including rural-urban migration, international legal and illegal migration, population growth, technological change, education, the environment and ethics.

Fiscal policy is critical to the development of poor countries. Public spending on pro-poor services and public goods must be increased, tax revenues must be mobilized, and macro-economic stabilization must be achieved without inhibiting growth, poverty reduction and post-conflict reconstruction. This book provides both a comprehensive and balanced guide to the current policy debate and new results on the development impact of fiscal policies. It is essential reading for students of development economics as well as all those seeking to improve policy-effectiveness.
