EECS 203: Discrete Mathematics - Spring 2016  
Lecture 11: February 25 11-5 Now with our choice of  $n = 2 + 1/2 \log n$   $(2/)$   $1 + 2$   $+ 1$   $\log n$   $(2/)$ , this yields  $\Pr[\text{some cut of size } c \text{ fails}] = n - (2 + 1) = pc$ . This concludes the argument for item 2 and the analysis of the algorithm claimed in Theorem 11.2.

ECE 272 | Electrical Engineering and Computer Science ...  
Hi there! I took EECS 281 last semester. I think I may be able to help. Any advice on how to be successful in 281? I'd say most important thing would be to START EARLY, as all of your peers, TAs, and professors have told you since the beginning of EECS 280. Starting would mean reading the specs on day 1 and thinking about what data structures to use.
