A reproduction of the Floyd Clymer Factory Workshop Manual, as published in Clymer's Metropolitan Owners Handbook, for the 1954-1962 Austin/Nash/American Motors Metropolitan. When Clymer published the Metropolitan Owners Handbook he had to reduce the overall size of the workshop manual to fit his 5 x 8 inch book size. This reduction in size resulted in extremely small images and text. The VelocePress edition has been restored to the original print size which is more than 200% larger than the Clymer publication and consequently, much easier to read! A profusely illustrated manual that includes all of the data you would expect from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components. There are separate sections that deal with the repair and overhaul procedures for the engine, cooling system, carburetion, exhaust system, clutch, A & B series transmission, shifting system, brakes and wheels, hubs and drums, rear axle, drive shaft, front suspension, steering gear, weather eye system, a detailed electrical service section plus an exhaustive 62 page body section that deals with all facets of the bodywork including the correct procedure for fitting replacement panels! This is a - must have - reference for any Metropolitan enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic automobiles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Metropolitan enthusiasts worldwide.

A faithful reproduction of the 1967 Floyd Clymer publication of the official factory Norton Workshop Twin Cylinder Manual for both the Lightweight and Heavyweight Twins. Models covered are the 250cc Jubilee (introduced in 1958) the 350cc Navigator (1960) and 400cc Electra (1963). Model 77, 88, 88SS, 99, 99SS, Sports Special, Manxman, Mercury, Atlas, G15, P11, N15, Ranger (P11A), which makes this manual appropriate for all Norton models that utilized this series of 500, 600, 650 and 750cc engines through the 1970 model year.//As expected from a factory publication this manual includes complete technical data, service and maintenance information and comprehensive detailed instructions for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic Norton motorcycles.//There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus an exhaustive Lucas electrical service section that includes test procedures for all the electronic components. With 74 illustrations to help explain the procedures this is a must have reference for any Norton enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to making a purchase of one of these classic motorcycles.//Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Norton enthusiasts worldwide.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
