I was shopping for a new Camaro and was happy to find their last V8 (a 2SS). Jairus (Kent) was a pleasure to work with. I didn't experience any of the high-pressure tactics that I've come to ...

Expert practical advice from an experienced race engine builder on how to build a high-performance version of Ford's naturally aspirated 4-cylinder 1600, 1800 & 2000cc Pinto engine which has been used in Ford's most popular cars (Escort, Capri, Cortina & Sierra - Ford/Mercury Capri, Pinto, Bobcat in USA) over many years. Whether the reader wants a fast road car or to go racing, Des explains, without using technical jargon, just how to build a reliable high-power engine using as many stock parts as possible and without wasting money on parts and modifications that don't work. Also covers Cosworth versions of Pinto engines and fitting Cosworth heads to Pinto blocks. Does not cover 1300, E-Max 1600 or American-built 2300.

Speed tuning theory and practice, costs, horsepower and torque for all 1932 and later Ford & Mercury Flathead V8s. The performance fundamentals: power, cam, carburetion, compression exhaust and ignition are all covered in this 1951 classic handbook. Details planning the modifications, fitting the block, boring an stroking, flathead and over head-valve cylinder head, scams, pistons, rings, intake manifolds, exhaust headers and special ignitions. A special chapter discusses superchargers.

Step-by-step guide to building a dream sportscar on a budget. Based on available Ford Sierra mechanical components: use a straight 4 or V8 engine, including Pinto, Zetec or Rover K-Series. All parts available from Tiger Sportscars.

This book was originally intended to serve as a basis for the organisation of carboretory automobile classes for car mechanics. Nowadays, this book from 1922 provides a very detailed and comprehensive view into all technical details of pre-war automobiles.

Covers all aspects of modifying the MG Midget and Austin Healey Sprite for high performance. Includes engine/driveline, suspension, brakes, and much more. with 400 mainly colour photos and exclusive tuning advice, this is a MUST for any Sprite or Midget owner.

The epic story also told in the film FORD V. FERRARI: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.
