A comprehensive reference for the poultry industry-Volume 1 describes everything from husbandry up to preservation With an unparalleled level of coverage, the Handbook of Poultry Science and Technology provides an up-to-date and comprehensive reference on poultry processing. Volume 1 describes husbandry, slaughter, preservation, and safety. It presents all the details professionals need to know beginning with live poultry through to the freezing of whole poultry and predetermined cut parts. Throughout, the coverage focuses on one paramount objective: an acceptable quality and a safe product for consumer purchase and use. The text includes safety requirements and regulatory enforcement in the United States, EU, and Asia. Volume 1: Primary Processing is divided into seven parts: Poultry: biology to pre-mortem status-includes such topics as classification and biology, competitive exclusion, transportation to the slaughterhouse, and more Slaughtering and cutting-includes the slaughterhouse building and required facilities, equipment, and operations; carcass evaluation and cutting; kosher and halal slaughter; and more Preservation: refrigeration and freezing-includes the biology and physicochemistry of poultry meat in rigor mortis under ambient temperature, as well as changes that occur during freezing and thawing; engineering principles; equipment and processes; quality; refrigeration and freezing for various facilities; and more Preservation: heating, drying, chemicals, and irradiation Composition, chemistry, and sensory attributes-includes quality characteristics, microbiology, nutritional components, chemical composition, and texture of raw poultry meat Eggs-includes egg attributes, science, and technology Sanitation and Safety-includes PSE, poultry-related foodborne diseases, OSHA requirements, HACCP and its application, and more

The aim of this book is to help create new feedstuffs for poultry and farm animals from the agro-industry and to mobilize the neglected waste as a feedstuff to lower the price of animal products such as eggs, white and red meat, milk, etc. Furthermore, this book aims to contribute to the campaign against hunger in the developing world and to reduce the competition between animals and human beings for cereals and pulses. Accordingly the global pollution problem will be reduced. This book will be of great interest to all those involved in the animal feed and poultry industries, in agricultural universities, and in research establishments where animal nutrition is studied and taught.

Poultry Products Processing: An Industry Guide covers all major aspects of the modern poultry further processing industry. The author provides a comprehensive guide to the many steps involved in converting poultry muscle (chicken, turkey, duck, ratite, etc.) into meat and highlights the critical points required to assure high quality and safe product manufacturing. The book opens with an overview of the poultry industry and then discusses poultry anatomy and muscle biology as they relate to meat quality and potential problems associated with further processing. Several chapters are devoted to meat product formulations (including numerous recipes), processing equipment, and principles of equipment operation. A separate chapter is devoted to the growing field of battering and breading poultry products, such as chicken nuggets, with many illustrations of equipment operation, discussions of the various breading employed, and trouble shooting. Another section focuses on food safety, microbiology, sanitation methods, and HACCP, including models for primary and further processing. Material on meat color, color defects, flavor, and sensory analysis is also included to help the reader understand factors affecting the challenges and problems the industry faces when marketing poultry products.

Why Poultry farm, Housing Requirements, Poultry Brooding, Housing & Equipment, Feed formulations, Disease Prevention, Economic Raising of Poultry, Ducks, Quail and Turkey, List of poultry feed manufactures, distributor and suppliers, list of equipment manufacturer/suppliers etc.

A comprehensive reference for the poultry industry-Volume 2 describes poultry processing from raw meat to final retail products With an unparalleled level of coverage, the Handbook of Poultry Science and Technology provides an up-to-date and comprehensive reference on poultry processing. Volume 2: Secondary Processing covers processing poultry from raw meat to uncooked, cooked or semi-cooked retail products. It includes the scientific, technical, and engineering principles of poultry processing, methods and product categories, product manufacturing and attributes, and sanitation and safety. Volume 2: Secondary Processing is divided into seven parts: Secondary processing of poultry products-an overview Methods in processing poultry products-includes emulsions and gelations; breeding and battering; mechanical deboning; marination, cooking, and curing; and non-meat ingredients Product manufacturing-includes canned poultry meat, turkey bacon and sausage, breaded product (nuggets), paste product (pâté), poultry ham, luncheon meat, processed functional egg products, and special dietary products for the elderly, the ill, children, and infants Product quality and sensory attributes-includes texture and tenderness, protein and poultry meat quality, flavors, color, handling refrigerated poultry, and more Engineering principles, operations, and equipment-includes processing equipment, thermal processing, packaging, and more Contaminants, pathogens, analysis, and quality assurance-includes microbial ecology and spoilage in poultry and poultry products; campylobacter; microbiology of ready-to-eat poultry products; and chemical and microbial analysis Safety systems in the United States-includes U.S. sanitation requirements, HACCP, U.S. enforcement tools and mechanisms

Describes equipment and procedures for rearing, managing, and breeding poultry and considers the preparation of chickens and eggs for use
