(SCG) Overview The
IntelliChlor Salt
Chlorine Generator

(SCG) uses a process known as electrolysis to produce chlorine gas which immediately dissolves into a solution to create Hypochlorite and Hypochlorous acid pool and spa water sanitizer from a low concentration of salt added to the pool water.

Intellichlor

IntelliChlor Overview

The IntelliChlor™ salt chlorinator uses a process known as electrolysis to produce Sodium Hypochlorite (liquid chlorine) from a low concentration of salt added to the pool water. Hypochlorite kills bacteria, oxidizes organic material, and kills algae, then reverts back to salt.

with minimum flow of 25 gpm. For high flow applications, use a bypass loop. Only use pipe couplings that meet Schedule 80, maximum pressure 150 psi at 70° F.

IntelliChlor Power Center

The IntelliChlor™ salt chlorinator uses a process known as
