Seventeen in a series of annual reports comparing business regulation in 190 economies, Doing Business 2020 measures aspects of regulation affecting 10 areas of everyday business activity.

The government of Qatar has made significant investments in post-secondary education to ensure that Qataris are able to contribute to the country's social and economic goals. The authors describe RAND's analysis of occupational demand and related post-secondary educational opportunities, and offer recommendations for improving the country's current provision of post-secondary education.

Relations between the European Union (EU) and the Gulf Cooperation Council (GCC) are at a crossroads. After the derailment of the negotiations for the Free Trade Agreement (FTA) in 2008, the cooperation between the two regional blocs has remained low-key in a number of different areas, while the unprecedented changes that have taken place in North Africa and the Middle East, the common neighbourhood of the EU and the GCC, have not led to a renewed, structured cooperation on foreign and security policy issues. This volume addresses the shortcomings and potential of EU-GCC relations by taking stock of their past evolution and by advancing policy recommendations as to how to revamp this strategic cooperation. In this light, it highlights the areas where greater room for manoeuvre exists in order to enhance EU-GCC relations, discusses the instruments available and sheds light on the features of the regional and international context that are likely to significantly influence the new phase in the mutual relation between the two blocs. The book is the result of the research conducted in the framework of the project ' Sharaka — Enhancing Understanding and Cooperation in EU-GCC Relations ' co-funded by the European Commission.

The Electrical Test Technician Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: mathematics; analytical ability; electrical principles; workplace safety; equipment operation; and more.

Mal Lawal is an extraordinary exhibition by the Qatar Museums Authority that offers a rare glimpse into the private collections that exist in Qatar, while also providing a unique overview of contemporary Qatari art. Underlining the importance of acquiring and developing a personal collection that will benefit future generations, offering them a way to learn from the past while highlighting how even the most ordinary objects can evolve over time to gain great value, Mal Lawal draws a connection between the old - what has been lovingly collected and preserved - and the new, the original works of art being created today by Qatari artists today.

The 2006 International Mechanical Code provides up-to-date, comprehensive coverage that establishes minimum regulations for mechanical systems.

The aim of this book is to help identify the potential role that renewable energy sources (RES) can play in the future energy mix of the GCC countries; it looks closely at the major past and present renewable energy initiatives and policies, as well as industrial and research capabilities in the region, with a specific focus on solar and wind energy technologies. In doing so, this study examines the drivers and requirements for the deployment of these energy sources and their possible integration into sectors as different as electricity generation, water desalination or green building. Illustrated by a wealth of practical cases and studies, and aspiring to be used as a reference book, this study aims to help researchers comprehend the overall capabilities and achievements of the GCC countries in the renewable energy field, so that perspectives on the region's strategic energy issues are objective and sustainable models are encouraged. Even when topics beyond their fields are discussed, researchers from many diverse fields will find the style to be accessible, while information remains detailed and 'technical'. The book's multidisciplinary approach gives voice to all stakeholders without judgment or partisanship, leaving the reader free to form his or her own opinion about the challenges that are at stake, and decide the course of action that is required by the current situation.

Simon introduces the broad range of applications for embedded software and then reviews each major issue facing developers, offering practical solutions, techniques, and good habits that apply no matter which processor, real-time operating systems, methodology, or application is used.

The Civil Engineering Standard Method of Measurement is used as the standard for the preparation of bills of quantities in civil engineering work. This new edition brings the method into line with changes in industry practices and extends into new areas.
