Batch Scripts are stored in simple text files containing lines with commands that get executed in sequence, one after the other. Scripting is a way by which one can alleviate this necessity by automating these command sequences in order to make one's life at the shell easier and more productive. This

The batch command  
ECHO is used for  
echoing commands  
on/off and printing  
message to the console.

Example. @echo OFF  
echo Hello. Output.

Hello. This command  
ECHO displays Hello in  
the console as shown

# Download File

## PDF Learn

above. Besides printing message, echo is also used for deciding whether or not to display the command itself. Like in this example as well, in the first line we have turned OFF echo, which makes sure that commands themselves are not printed.
