Online Library Magic Square Solutions

Students are presented with a 3 by 3 grid and a series of cards each containing an algebraic statement.

Students are required to place the cards on the grid in such a fashion that each row,

Online Library Magic Square

Solutions
each column and
each diagonal
add to give the
magic 'number'
of $12a + 15b$.
Students are
then challenged
to make up their
own puzzle.

*Algebra Magic
Square / STEM*

Step 1: The
magic sum is 15

Online Library Magic Square

Solutions
By definition,
every row,
column, and
diagonal has the
same sum M . Thus
each of first
row, second row,
and third row
has a sum of M .
So the first 3
rows sum to $3M$.

*How Many 3×3
Magic Squares*

*Sunday Puzzle -
Mind ...*

Magic squares
are square
grids, in this
instance with a
3x3 pattern that
are filled with
numbers, in such
a way that each
row, each
column, and the
two diagonals

Online Library Magic Square

Solutions
add up to the same number. By giving some of the numbers in the square, usually, including one complete row, children should be able to work out the missing numbers.

Online Library Magic Square Solutions

Worksheet

(teacher made)

The 4 x 4 Magic Square to the left is the "basic" 4 x 4 Magic Square. It uses the numbers 1 to 16 inclusive, and its "Magic Total" is 34, as predicted by the

Online Library Magic Square

Solutions formula shown on
another page.

There are
exactly 880 4×4
Magic Squares
that can be
created.

*4 x 4 Magic
Squares - Mark
Farrar*

A popular
mathematical
stunt is to

Online Library Magic Square Solutions

create a “magic square”. This is a grid, most commonly 3×3 or 4×4 , filled with numbers. The numbers in every row add up to the same number. Here is an example:

*How to solve a
magic square -
Page 30/45*

Cosmos Magazine

Magic squares
can be made with
the 25 dominoes
remaining when
you have put
aside (0-5),
(0-6) and (1-6).
The total of
each row, each
column and each
diagonal is 30.
This can be done
in many

Online Library Magic Square

Solutions different ways.

As a group project you might like to see how many distinct magic domino squares you can find.

*Domino Magic
Rectangle -
NRICH*

Bordered magic square when it

Online Library Magic Square

Solutions
is a magic square and it remains magic when the rows and columns at the outer edge is removed. They are also called concentric bordered magic squares if removing a border of a square

Online Library Magic Square Solutions

successively gives another smaller bordered magic square. Bordered magic square do not exist for order 4.

*Magic square -
Wikipedia*

In mathematics, we call magic square, a square

Online Library Magic Square

Solutions of numbers whose sum of rows, columns and diagonals is equal to the same number. The goal of this game is to find the missing number so that the square is magic. It is an excellent exercise in

Online Library Magic Square Solutions

mental
arithmetic
training.

*Magic Squares -
math game for
kids from 7
years old ...*

Drag the numbers
into the green
cells to make a
magic square.

The totals of
each row, column

Online Library Magic Square

Solutions
and diagonal
should be the
same.
