BLACK BOX TESTING: Black Box
Testing is a software
testing method in which
testers evaluate the
functionality of the
software under test without
looking at the internal code
structure. This can be
applied to every level of
software testing such as
Unit, Integration, System
and Acceptance Testing.

Software Testing Material Manual Testing. Manual Testing is a type of software testing in which test cases are executed manually by a tester without using any automated tools. The purpose of Manual Testing is to identify the bugs, issues, and defects in the software application. Manual software testing is the most primitive technique of all testing types and it helps to find critical bugs in the software application.
