Anyways guys, I
have a Mazda
Protege 323 2000
and it has a 1.6L
DOHC engine in it
that only produces
78kw's but the car
only weights

Access Free Mazda B6

1100kg's so it is
easy to make a
light car like this
fast so just
wondering how
much kw's I can
get without putting
a turbo (P-Plates)
or swapping the
engine all together
and tell me how
much it would cost
aswell thanks .
