law who feel that they have acquired a body of knowledge, but do not feel confident about using it effectively in exams. This book sets out to demonstrate how to apply the knowledge to the question and how to structure the answer.

This book looks at the historical use of allegations of unconscionable conduct within the context of independent trade finance instruments, such as letters of credit and demand guarantees. It makes a detailed survey of the law of unconscionable conduct, the complexities of the doctrine of independence, and the circumstances where the former prevails to provide relief from abuse. It also completes a wide-ranging, sequential audit of the relevant case law in both Singapore and Australia where unconscionable conduct was alleged in independent instrument matters. The audit examines every case along the lines of precedent and details the contribution each makes to the law. Focussing on the jurisdictions of Singapore, Australia, and Malaysia, the book lays out the case for the broad adoption of unconscionable conduct in this domain. With its premises founded in precedent and statute, it describes the elements of independent instrument unconscionability as already laid down in law and links it to international banking practice.

This is the seventh edition of the leading work on transnational and comparative commercial, financial, and trade law, covering a wide range of complex topics in the modern law of international commerce and finance. As a guide for students and practitioners it has proven to be unrivalled. The work is divided into three volumes, each of which can be used independently or as part of the complete work. Volume 1, in the first chapter, covers the roots and foundations of private law; the different origins, structure, and orientation of civil and common law; the forces behind the emergence of a new transnational commercial and financial legal order, its meaning, concepts, and operation; the theoretical basis of

the transnationalisation of the law in the professional sphere in that order; its methodology and the autonomous sources of the new law merchant or modern *lex mercatoria*, its international finance-driven impulses, and its relationship to domestic and transnational public policy and public order requirements. The second chapter covers the transnationalisation of dispute resolution in that order, especially international arbitration, and contains a critical analysis of the main challenges to its success, continuing credibility, and effectiveness. All three volumes may be purchased separately or as part of a single set.

The Routledge Handbook of Maritime Trade around Europe 1300-1600 explores the links between maritime trading networks around Europe, from the Mediterranean and the Atlantic to the North and Baltic Seas. Maritime trade routes connected diverse geographical and cultural spheres, contributing to a more integrated Europe in both cultural and material terms. This volume explores networks' economic functions alongside their intercultural exchanges, contacts and practical arrangements in ports on the European coasts. The collection takes as its central question how shippers and merchants were able to connect regional and interregional trade circuits around and beyond Europe in the late medieval period. It is divided into four parts, with chapters in Part I looking across broad themes such as ships and sailing routes, maritime law, financial linkages and linguistic exchanges. In the following parts - divided into the Mediterranean, the Baltic Sea, and the Atlantic and North Seas - contributors present case studies addressing themes including conflict resolution, relations between different types of main ports and their hinterland, the local institutional arrangements supporting maritime trade, and the advantages and challenges of locations around the continent. The volume concludes with a summary that points to the extraterritorial character of trading systems during this fascinating period of expansion. Drawing together an international team of contributors,

This book provides a clear overview of the legal rules relating to directors' disqualification in Australia, Germany, South Africa, the UK and the US, and to highlight the differences in the disqualification regimes of these jurisdictions. The book seeks to determine whether disqualification on application should be developed further as a corporate law and corporate governance tool to ensure that individuals who have a proven record of posing a particular risk to the business community, shareholders and creditors, are indeed disqualified from being directors. The book is unique as it provides a single source where the disqualification regimes of all these jurisdictions are explored and compared. The book will appeal to scholars of corporate law, regulators and policy-makers. The book will also be of particular interest to senior managers and directors to determine precisely what the laws regarding disqualification of company directors are, and what type of behaviour might expose them to potential disqualification.
