Chevrolet had two types of 3.8-liter V-6 engines: the 3.8-liter Buick V-6 and the short-lived Chevrolet 3.8-liter version. The venerable and immensely popular Buick V-6 survives today as the GM 3800 and serves as the base engine for many Chevy cars. It can trace its origins to the 198-cubic-inch V-6 that powered the ...

They do, however, share the 60 degree engines' (Chevy 2.8, 3.1, 3.4, 3.6, 3.9 or Cadillac 4.1, 4.5, 4.9 V8) bellhousing pattern. The 3800 engine is related to the 90 Degree V6 in certain concepts and technologies only - Buick engineers taking what they had learned about the V6 and incorporating it into an entirely new design of engine.

The Novak Guide to The Buick 90 Degree V6 Engine
The Buick V6, popularly referred to as the 3800 in its later incarnations, originally 198 cu in (3.2 L) and initially marketed as Fireball at its introduction in 1962, was a large V6 engine used by General Motors.The block is made of cast iron and all use two-valve-per-cylinder iron heads, actuated by pushrods.The engine, originally designed and manufactured in the United States, was also ...

Used Buick Grand National For Sale in New York, NY ...
Omc 3 8 Buick Engine I suspect OMC sold more 3.8's than any other V6. Mercruiser, Crusader, and Volvo Penta used them too, but in much smaller numbers. Condition is everything for a 27 year old engine. Probably the biggest issue for people around that motor is the points ignition. That's dated. Some don't want points, and all 3.8's are points.
