The most comprehensive guide on postgraduate grants and professional funding globally. For thirty-four years it has been the leading source for up-to-date information on the availability of, and eligibility for, postgraduate and professional awards. Each entry is verified by its awarding body and all information is updated annually.

The most authoritative and comprehensive guide available on postgraduate grants and professional funding worldwide. For over twenty years The Grants Register has been the leading source for up-to-date information on the availability of, and eligibility for, postgraduate and professional awards. With details of over 3,000 awards, The Grants Register is more extensive than any comparable publication. Each entry has been verified by the awarding bodies concerned ensuring that every piece of information is accurate. As an annual publication, each edition also provides the most current details available today. The Grants Register provides an ideal reference source for those who need accurate information on postgraduate funding: careers advisors, university libraries, student organisations, and public libraries. Also available on CD-ROM.

New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

Features information on studying at Postgraduate level in the UK, what is involved, what opportunities there are, lists details £75 million of funding available to Postgraduate students.

Philosophical paradigms, theoretical frameworks, and methodologies make up the answering and problem solving systems that define current research approaches. While there are multiple research method books, the subject lacks an update and integrated source of reference for graduate courses. Research Methodologies, Innovations and Philosophies in Software Systems Engineering and Information Systems aims to advance scientific knowledge on research approaches used in systems engineering, software engineering, and information systems and to update and integrate disperse and valuable knowledge on research approaches. This aims to be a collection of knowledge for PhD students, research-oriented faculty, and instructors of graduate courses.
