This collection of papers describes the recent development of travel health and vaccination services delivered by pharmacists. It is the first dedicated collection of its type and provides a template for the continued growth of pharmacy practice in this area. The articles examine and report on aspects of such services in the UK, US, Canada, Australia, Switzerland, and South Africa, which will provide useful insight for those in other countries developing such pharmacy-based services.

Successful pharmacy careers begin with successful rotations—and successful rotations start with this guide. Although rotations are crucial to the development of skills needed to practice pharmacy, there has been little available to guide students in the best way to prepare and make the most of these experiences—until now. Maximize Your Rotations: ASHP's Student Guide to IPPEs, APPEs, and Beyond breaks down everything you need to know into easy-to-navigate chapters. Inside you will find the skills required to excel while on IPPE or APPE rotations, along with competencies that may be unique to one type of rotation or another. Each chapter is written by an experienced preceptor, lending a valuable perspective. By using this text, you will gain an appreciation of the general expectations and typical activities of each rotation experience before you begin. Better preparation means better performance. Maximize Your Rotations will also be a resource throughout the experiential year, offering everything from reminders of clinical issues and statistical reviews to advice on interviewing, CV writing, professional organizations, and more. Maximize Your Rotations means less time getting up to speed—and more time getting ahead in your career. Your rotation experience can be the launching pad for your career, and there's no better guide than Maximize Your Rotations.

This comprehensive text provides fundamental information on a broad spectrum of essential topics in health-system pharmacy practice. From an overview of health delivery systems and hospital pharmacy through various practice settings such as home care, long term care, hospice and palliative care, ambulatory care, and managed care this text focuses on various elements important to health-system pharmacies. The Handbook of Institutional Pharmacy Practice is the first step in developing a career in pharmacy and provides opportunities for study in career enhancement. New chapters included in the FOURTH EDITION: Integrity of the Drug Supply Overview of the History of Hospital Pharmacy in the United States Interprofessional Teams/Collaborative Practice Models Development, Implementation and Monitoring Therapeutic Plans and Evidence-Based Medicine

As policies and laws related to vaccination change, pharmacists have increased opportunities to educate and vaccinate persons in their community. And with changes in available vaccines, immunization schedules, and dosing and administration recommendations, immunizing pharmacists have a responsibility to stay informed. This fourth edition of Immunization Handbook for Pharmacists (previously titled APhAs Immunization Handbook) provides practical and timely updates for pharmacists and pharmacy staff who are involved in pharmacy-based immunization services. Updated throughout, the 20 chapters present a step-by-step process for developing and implementing immunization services.

FACILITATOR's Edition (with instructor's instructions) o Lead-Grow-Shape is a workbook for emerging pharmacy leaders, consisting of 35 modules, 35 rubrics, a template for co-curricular program, 44 worksheets, and 8 appendices. Encompasses American and Canadian pharmacy practice. Provides insights into leadership, self-awareness, professionalism, and innovation. o The Pharmacy Leadership & Education Institute (PLEI) is transforming its 30-year heritage of leader training for student pharmacists into a workbook in modular form. PLEI offers Lead-Grow-Shape in two formats: a 340-page Student Edition and a 372-page Facilitator Edition. o The Modules in this workbook can be mixed and matched as a campus wishes. We've built at least two modules to match each of the four ACPE elements and eleven CAPE competencies for self-awareness, leadership, innovation, and professionalism. The book can support a 1- or 2-credit course for P1s, and also a capstone course for P3s or P4. Various Modules could easily be incorporated into several courses, blocks, or threaded curricula. Imagine Lead-Grow-Shape as several baskets of ingredients and the instructor on campus gets to be the celebrity chef (a la Chopped)!

The Public Health Foundation (PHF) in partnership with the Centers for Disease Control and Prevention (CDC) is pleased to announce the availability of Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition or "The Pink Book" E-Book. This resource provides the most current, comprehensive, and credible information on vaccine-preventable diseases, and contains updated content on immunization and vaccine information for public health practitioners, healthcare providers, health educators, pharmacists, nurses, and others involved in administering vaccines. "The Pink Book E-Book" allows you, your staff, and others to have quick access to features such as keyword search and chapter links. Online schedules and sources can also be accessed directly through e-readers with internet access. Current, credible, and comprehensive, "The Pink Book E-Book" contains information on each vaccine-preventable disease and delivers immunization providers with the latest information on: Principles of vaccination General recommendations on immunization Vaccine safety Child/adult immunization schedules International vaccines/Foreign language terms Vaccination data and statistics The E-Book format contains all of the information and updates that are in the print version, including: · New vaccine administration chapter · New recommendations regarding selection of storage units and temperature monitoring tools · New recommendations for vaccine transport · Updated information on available influenza vaccine products · Use of Tdap in pregnancy · Use of Tdap in persons 65 years of age or older · Use of PCV13 and PPSV23 in adults with immunocompromising conditions · New licensure information for varicella-zoster immune globulin Contact bookstore@phf.org for more information. For more news and specials on immunization and vaccines visit the Pink Book's Facebook fan page

APhA's Immunization Handbook provides numerous guidelines, tips, and resources for building and sustaining a successful immunization practice. Written in a concise and quick look-up format, this handy resource is an essential tool for the busy pharmacist. Key Features: Up to date CDC Immunization Schedules Frequently asked questions Billing for the vaccine product and administration Information on 24 vaccines and vaccine products

The overall goal of this book is to give the reader a state-of-the-art synopsis of the pharmacist services domain. To accomplish this goal, the authors have addressed the social, psychosocial, political, legal, historic, clinical, and economic factors that are associated with pharmacist services. In this book, you will gain cutting-edge insights from learning about the research of experts throughout the world. The findings have relevance for enhancing pharmacist professionalism, pharmacist practice, and the progression of pharmacist services in the future.

Covering the skills needed for pharmaceutical care in a patient-centered pharmacy setting, Clinical Skills for Pharmacists: A Patient-Focused Approach, 3rd Edition describes fundamental skills such as communication, physical assessment, and laboratory and diagnostic information, as well as patient case presentation, therapeutic planning, and monitoring of drug intake. Numerous case examples show how skills are applied in clinical situations. Now in full color, this edition adds more illustrations and new coverage on taking a medication history, physical assessment, biomarkers, and drug information. Expert author Karen J. Tietze provides unique, pharmacy-specific coverage that helps you prepare for the NAPLEX and feel confident during patient encounters. Coverage of clinical skills prepares you to be more involved with patients and for greater physical assessment and counselling responsibilities, with discussions of communication, taking a medical history, physical assessment, reviewing lab and diagnostic tests, and monitoring drug therapies. A logical organization promotes skill building, with the development of each new skill building upon prior skills. Learning objectives at the beginning of each chapter highlight important topics. Self-assessment questions at the end of each chapter help in measuring your comprehension of learning objectives. Professional codes of ethics are described in the Ethics in Pharmacy and Health Care chapter, including confidentiality, HIPAA, research ethics, ethics and the promotion of drugs, and the use of advance directives in end-of-life decisions. Numerous tables summarize key and routinely needed information. Downloadable, customizable forms on the companion Evolve website make it easier to perform tasks such as monitoring drug intake and for power of attorney.
