In her 35th novel, science fiction master Sheri S. Tepper boldly weaves together the storylines of eleven of her previous works—from King ' s Blood Four (1983) to The Waters Rising (2010). In Fish Tails, two of Sheri S. Tepper ' s beloved characters—Abasio and Xulai (A Plague of Angels and The Waters Rising)—and their children travel from village to village scattered across the sparsely populated land of Tingawa. They are searching for others who might be interested in adopting their sea-dwelling lifestyle. Along their journey they encounter strange visitors from the far-off world of Lom, characters from Tepper ' s nine-book True Game series of novels—Mavin Manyshaped, Jinian Star-eye, and Silkhands the Healer—all of whom have been gathered up by an interfering, time-traveling, rule-breaking do-gooder to do one last good deed on earth before its metamorphosis is complete. For the waters are rising and will soon engulf the entire planet, transforming it utterly and irrevocably.

All power comes at a price... Ruxandra learned everything she knew growing up in a convent. Training to be the perfect nobleman's wife, she relished the prospect of a simple life. After performing a mysterious ritual over her, Ruxandra gains uncontrollable supernatural powers. Alone, terrified, and faced with an unknown future, Ruxandra is left to forge a new life for herself. There's only one thing she knows: if she doesn't learn to control her unnatural instincts, she'll destroy every last shred of her humanity.

Aleph is a machine mentality overseeing a future Earth largely bereft of humans, most of whom have sublimed into a virtuality. Remaining are the smug but cautious adherents of science. Amanda, still a teen at age 30, is a skilled violinist and mathematician but craves the applause of the Mall for some daring exploit. In a nearby enclave live the rustic, non-scientific people who worship the god of their choice. In the center of their poly-religious valley a wicked tower has emerged, surely a tool of evil temptation. Far below, a supersonic railroad is being constructed. Amanda conceives a dangerous feat: to enter the valley and descend to the rushing train, hitching a mad ride to the next city. Using a cyber "Liar bee," she buzzes the ear of young Matthewmark, who chafes under the restrictions of his own narrow society. He agrees to aid Amanda and her friend Vikram Singh, but the scheme goes horribly wrong. Vik dies; Matthewmark's brain is seriously damaged, although he recovers with advanced neurological prostheses. This treatment, condemned by his own people, allows him contact with the AI Aleph. In a series of startling moves, Amanda graduates to adulthood (and her modish clipped speech patterns give way to this new sophistication), while Matthewmark explores uncanny and sometimes very funny opportunities in the Alephverse, climaxing in the dismantling of the solar system and its embrace by the hyperuniverse beyond ours. This is the Singularity, at last, the Transcension, and everyone
