The State University of New York, Morrisville, N.Y., announced that John Campisi of Manalapan was named to the dean's list for the ... with majors in Sociology and Political Science with Honors ...

Sociology, emerging in the 19th century as the study of national societies, is the intellectual product of its time, power relations and social imaginaries.

As a discursive practice that was enmeshed in the meta-narratives of modernity, the discipline of sociology bears the inherent capacity to shape socially shared concepts and construct collective identities. This book examines the relationships between sociology and projects of national identity construction, and presents a critique of Shmuel N. Eisenstadt, the prominent Israeli sociologist known as the "father of Israeli sociology". The book focuses on Eisenstadt's sociology of Israel as a case of knowledge construction within an ideological system and examines the relationships between his various sociological analyses of Israeli society and the Zionist imaginary, namely the deeply entrenched political myths and historiographical narratives that constitute Israel's hegemonic national identity. By emphasizing the interrelation between textuality, identity, and loaded language, the volume seeks to demythologize Eisenstadt's sociology of Israel. Three major concepts in Eisenstadt's scholarship are specifically thematized: integration, civilization, and modernities. In each of these foci, the author shows how Eisenstadt's sociological conjectures reproduce dominant Zionist historiographical representations of the past, rationalize prevalent social hierarchies, reify the boundaries of a national collective "Self", and render legitimacy to Israel's governing ethnocratic tendencies, underlying the premises of the Zionist settler-colonial project. Sociological Knowledge and Collective Identity will appeal to those interested in the interconnectedness of sociology and political memory, as well as in a radical postcolonial reconstruction of sociology.

Winner of the prestigious MacIver Award when it was first published, this remains a towering work of modern political sociology, especially of macrosociology.

Its main objective is comparative analysis of political commonalities found in different societies, both historical and present. The book seeks to find some pattern or laws in the structure and development of such systems. The imaginative use of data helps to bring order into what might otherwise be considered a speculative volume. The purpose of The Political Systems of Empires is to apply sociological concepts to the analysis of historical societies through the comparative analysis of a special type of political system. This analysis does not purport to be historical or descriptive. Its main objective is comparative analysis of political commonalities found in different societies. The book seeks to find some pattern or laws in the structure and development of such systems.

About interpersonal relations in society.

This selection from Max Weber's writings presents his variegated work from one central focus, the relationship between charisma on the one hand, and the process of institution building in the major fields of the social order such as politics, law, economy, and culture and religion on the other. That the concept of charisma is crucially important for understanding the processes of institution building is implicit in Weber's own writings, and the explication of this relationship is perhaps the most important challenge which Weber's work poses for modern sociology. Max Weber on Charisma and Institution Building is a volume in "The Heritage of Sociology," a series edited by Morris Janowitz. Other volumes deal with the writings of George Herbert Mead, William F. Ogburn, Louis Wirth, W. I. Thomas, Robert E. Park, and the Scottish Moralists—Adam Smith, David Hume, Adam Ferguson, and others.

Editors Landman and Robinson have compiled an excellent tour d'horizon of comparative politics. Distinguished contributors explore theoretical and methodological issues as well as examine the critical substantive domains that animate today's comparativists. Graduate students and academics will want to keep this volume on their book shelf - Professor Mark Irving Lichbach, University of Maryland 'The SAGE Handbook of Comparative Politics is a major new resource for scholars of comparative politics, and of political science more generally. The Handbook covers the field with admirable thoroughness, but does not sacrifice depth for breadth. The chapters are written by notable scholars who provide rich discussions of their topics, and help to move the sub-discipline forward' - B. Guy Peters, Professor, University of Pittsburgh 'The SAGE Handbook of Comparative Politics presents, in one volume, an authoritative overview of the theoretical, methodological and substantive elements of comparative political science. The 28 specially commissioned chapters, written by renowned comparative scholars, guide the reader through the central issues and debates, presenting a state-of-the-art guide to the past, present and possible futures of the field. The Handbook is divided into three parts. The first considers comparative methodologies and reviews the interactions between various sub-fields of comparative politics: political economy; political sociology; area studies; international relations; and institutional analysis. The second section examines nine 'classic' issues of concern to comparativists, including government formation, political behaviour and democratization. In the final section, nine new and emerging areas of comparative research are considered, such as terrorism, electoral corruption, human rights and regional integration. The SAGE Handbook of Comparative Politics is an essential resource for researchers in political science, political sociology, political economy, international relations, area studies and all other fields with a comparative political dimension.

This volume collects new research about multiple modernities and globalization. It shows the new turn of sociological theory in the contemporary scene with respect to multiple modernities, multi-centrism, transglobality, hybridization and multiculturalism, comparative cultures, and explores it as a new area of societal communication.

Weber's classic study which deals specifically with: Types of Asceticism and the Significance of Ancient Judaism, History and Social Organization of Ancient Palestine, Political Organization and Religious Ideas in the Time of the Confederacy and the Early Kings, Political Decline, Religious Conflict and Biblical Prophecy.
