You can further break down the types of research design into five categories:
1. Descriptive research design: In a descriptive design, a researcher is solely interested in describing the situation or case under their research study. It is a theory-based design method which is created by gathering, analyzing, and presenting collected data.

Research Design: Definition, Characteristics and Types ...

APA's Ethics Code, which offers general principles and specific guidance for research activities. Moreover, despite the sometimes tense relationship researchers can have with their institutional review boards (IRBs), these groups can often help researchers think about how to address potential dilemmas before projects begin, says Panicker.

Five principles for research ethics

Research Design • refers to a scheme or plan of action for meeting the objectives • a blueprint for conducting a study that maximizes control over factors that could interfere with the validity of the findings. • the researcher's plan – how the study will be conducted, – type of data that will
