Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

A first-time examination of sexual anorexia, an extreme fear of sexual intimacy and obsessive avoidance of sex, by the acknowledged leader in the treatment of compulsive sexual behavior and recovery. A first-time examination of sexual anorexia, an extreme fear of sexual intimacy and obsessive avoidance of sex, by the acknowledged leader in the treatment of compulsive sexual behavior and recovery. Author Dr. Patrick Carnes begins by defining sexual anorexia and demonstrating how it and its parallel disorder, sexual addiction and compulsivity, often arise from a background of childhood sexual trauma, neglect, and other forms of abuse, Carnes explores the numerous dimensions of sexual health, examining key issues which must be addressed and resolved for recovery to proceed. Utilizing extensive research and elucidating case studies, Carnes develops concrete tasks and plans for restoring nurturing and sensuality, building fulfilling relationships, exploring intimacy, and creating healthy sexuality. Woven throughout the book are stories of recovery which illustrate sexual healing principles, model new behavior, and support motivation for change. Sexual Anorexia enables those suffering from this disorder to recognize that sex need not be a furtive enemy to be fought and defeated but, instead, a deeply sensual, passionate, fulfilling, and spiritual experience that all human beings are innately entitled to.

The “ engrossing, thoroughly researched look at women who are in romantic relationships with incarcerated men ” —fully updated with twenty-first-century cases (Publishers Weekly). In 1991, Sheila Isenberg ’ s classic study Women Who Love Men Who Kill asked the provocative question, “ Why do women fall in love with convicted murderers? ” Now, Isenberg returns to the same question in the age of smart phones, social media, mass shootings, and modern prison dating. The result is a compelling psychological study of prison passion in the new millennium. Isenberg conducts extensive interviews with women who seek relationships with convicted killers, as well as conversations with psychiatrists, social workers, and prison officials. She shows that many of these women know exactly what they are getting into—yet they are willing to sacrifice everything for the sake of a love without hope, promise, or consummation. This edition of Women Who Love Men Who Kill includes gripping new case studies and an absorbing look at how the digital age is revolutionizing this phenomenon. Meet the young women writing “ fan fiction ” featuring America ’ s most sadistic murderers; the killer serving consecutive life sentences for strangling his wife and smothering his toddler daughters—and the women who visit him in prison; the high-powered journalist who fell in love and risked it all for “ Pharma Bro ” Martin Shkreli; and many other women absorbed in online and real-life dalliances with their killer men.

Early readers are introduced to the summer season. Simple sentences and bright pictures feature summertime activities.

Die tiefe Wirtschaftskrise in Folge der Corona-Pandemie stellt Kubas Sozialismus vor eine ungeahnte Belastungsprobe. Die Regierung in Havanna hat eine grundlegende Reform von Wirtschaft, Institutionengefüge und Sozialsystem auf die Agenda gesetzt. Der Band vereint Beiträge führender internationaler Experten und von der Insel selbst, die aus unterschiedlichen Perspektiven die Herausforderungen analysieren, vor denen Kuba heute steht.

A bold exploration and call-to-arms over the widening gap between AI, automation, and big data—and our ability to deal with its effects We are living in the first exponential age. High-tech innovations are created at dazzling speeds; technological forces we barely understand remake our homes and workplaces; centuries-old tenets of politics and economics are upturned by new technologies. It all points to a world that is getting faster at a dizzying pace. Azeem Azhar, renowned technology analyst and host of the Exponential View podcast, offers a revelatory new model for understanding how technology is evolving so fast, and why it fundamentally alters the world. He roots his analysis in the idea of an “ exponential gap ” in which technological developments rapidly outpace our society ’ s ability to catch up. Azhar shows that this divide explains many problems of our time—from political polarization to ballooning inequality to unchecked corporate power. With stunning clarity of vision, he delves into how the exponential gap is a near-inevitable consequence of the rise of AI, automation, and other exponential

technologies, like renewable energy, 3D printing, and synthetic biology, which loom over the horizon. And he offers a set of policy solutions that can prevent the growing exponential gap from fragmenting, weakening, or even destroying our societies. The result is a wholly new way to think about technology, one that will transform our understanding of the economy, politics, and the future.

This book examines the problem of inadequate access to information and communication technology (ICT) and the need to develop appropriate pro-poor ICT policies within the Latin American and Caribbean context. The authors show how market reforms have failed to ensure that the benefits of the Information Society have spread across the many social and economic divides that characterize the region. The authors explain and support the formulation of a new perspective on ICT access and develop an analytical framework with which to assess the critical variables involved in effective ICT adoption in developing regions. The research supports policy reform that builds upon the achievements of market liberalization efforts in the region but which must also address the realities of digital poverty, a concept that grasps the multiple dimensions of inadequate levels of access to ICT services by people and organizations, as well as the barriers to their productive use. This is the first publication of the Regional Dialogue on the Information Society (DIRSI), a regional network of leading researchers concerned with disseminating knowledge that supports the participation of marginalized communities using ICTs in Latin America and the Caribbean. The book will be of interest to anyone interested in ICTs and international development policy and practice."

A fascinating look at Open Science and the democratization of knowledge in international development and social transformation.
