An innovative approach to winning more profitable sales in the growing professional services industry In recent years, professional services providers have had to rethink their sales methods and adapt to profound changes in the way clients buy services. In response, Winning the Professional Services Sale argues for fundamental changes in the seller's mindset and sales strategies. Rather than pressing the sale, salespeople must help clients buy--the way that works best for each client. This new approach gives buyers what they now want in a services seller: a consultative problem solver, change agent, and solution integrator, all rolled into one. Author Michael McLaughlin presents a strategy for winning new business with a holistic approach to each client relationship. Only by fully understanding a sale from every angle, including its impact on the client's business and career, can salespeople thrive in the new era of the service economy.

In today's markets, success no longer depends on communicating the value of products or services. It rests on the crucial ability to create value for customers. Sales forces need to retool current strategies by recognizing the customer's dominant power in today's economy and what that means for those who sell. Capitalizing on research into the practices of cutting edge companies, the authors show how the successful sales force breaks away from traditional thinking and transforms themselves into complex business processes with multiple sales approaches and selling mdoels that meet the demands of today's sophisticated customers.
