The Department of Mad Scientists contains material that has barely been reported in the general media—in fact, only 2 percent of Americans know much of anything about the agency. But as this fascinating read demonstrates, DARPA isn't so much frightening as it is inspiring—it is our future.

The Department of Mad Scientists: How DARPA Is Remaking ...

It is not mad scientists who are engaged in much of the work but rather sane engineers. DARPA has had identity crises in its half-century of existence. The fall of the Soviet Union in 1989 raised questions about the continuing need for a defense-driven strategy, and so in 1993 the "D" was dropped to leave ARPA, which was actually the name it bore from its beginnings to 1972.
