A blinding flash ... then darkness. Bria Ford and her three closest friends are stranded on a country highway in the middle of a November night. No phones. No car. No lights. They put their lives in the hands of handsome Jonah Page and his flinty sister, East, strangers who somehow know Bria better than she knows herself.

With his earlier two series in Egyptology, Gerald Massey turned existing doctrine on its head to argue that not only had Egypt spawned human civilization, but that Egyptian mythology was the basis for Jewish and Christian beliefs. The culmination of his years at this particular intellectual pursuit, Ancient Egypt: The Light of the World is Massey’s crown jewel. In this, the most philosophical (in both tone and concept) of his Egyptological works, Massey, ever the intrepid escort, leads a tour through thousands of years of sociological, cultural, and spiritual development, all the while pointing, with dazzling reason and persuasive prose, to a distant, common, Egyptian origin. British author GERALD MASSEY (1828-1907) published works of poetry, spiritualism, Shakespearean criticism, and theology, but his best-known works are in the realm of Egyptology, including A Book of the Beginnings and The Natural Genesis.

A deeply resonant memoir for anyone who has loved and lost, from acclaimed poet and Pulitzer Prize finalist Elizabeth Alexander. In The Light of the World, Elizabeth Alexander finds herself at an existential crossroads after the sudden death of her husband. Channeling her poetic sensibilities into a rich, lucid price, Alexander tells a love story that is, itself, a story of loss. As she reflects on the beauty of her married life, the trauma resulting from her husband’s death, and the solace found in caring for her two teenage sons, Alexander universalizes a very personal quest for meaning and acceptance in the wake of loss. The Light of the World is at once an endlessly compelling memoir and a deeply felt meditation on the blessings of love, family, art, and community. It is also a lyrical celebration of a life well-lived and a paean to the priceless gift of human companionship. For those who have loved and lost, or for anyone who cares what matters most, The Light of the World is required reading.

From debut author London Shah, comes a thrilling futuristic Sci-Fi mystery perfect for fans of Illuminae and These Broken Stars.In the last days of the twenty-first century, sea creatures swim through the ruins of London. Trapped in the abyss, humankind wavers between hope and fear of what lurks in the depths around them, and hope that they might one day find a way back to the surface. When sixteen-year-old submersible racer Leyla McQueen is chosen to participate in the city’s prestigious annual marathon, she sees an opportunity to save her father, who has been arrested on false charges. The Prime Minister promises the champion whatever their heart desires. But the race takes an unexpected turn, forcing Leyla to make an impossible choice. Now she must brave unfathomable waters and defy a corrupt government determined to keep its secrets, all the while dealing with a guarded, hotheaded companion she never asked for in the first place. If Leyla fails to discover the truths at the heart of her world, or falls prey to her own fears, she risks capture-or worse. And her father will be lost to her forever.

This book contains an edition—with an extensive introduction, translation and commentary—of The Light of the World, a text on theoretical astronomy by Joseph Ibn Nahmias, composed in Judeo-Arabic around 1400 C.E. in the Iberian Peninsula. As the only text on theoretical astronomy written by a Jew in any variety of Arabic, this work is evidence for a continuing relationship between Jewish and Islamic thought in the late fourteenth and early fifteenth centuries. The text’s most lasting effect may have been exerted via its passage to Renaissance Italy, where it influenced scholars at the University of Padua in the early sixteenth century. With its crucial role in the development of European astronomy, as well as the physical sciences under Islam and in Jewish culture, The Light of the World is an important episode in Islamic intellectual history, Jewish civilization, and the history of astronomy.

In Light of the World: A Beginner’s Guide to Advent, author, professor, and biblical scholar Amy-Jill Levine explores the biblical texts surrounding the story of the birth of Jesus. Join her as she traces the Christmas narrative through the stories of Zechariah and Elizabeth, Mary, the journey to Bethlehem, and the visit from the Magi. These stories open conversations around connections of the Gospel stories to the Old Testament, the role of women in first-century Jewish culture, the importance of Mary’s visitation and the revolutionary implications of Mary’s Magnificat, the census and the stable, and the star of Bethlehem and the flight to Egypt. The book provides a rich and challenging learning experience for small groups and individual readers alike. As part of a larger four-week study that is perfect for Advent, it includes a DVD and a comprehensive leader guide.

Ye are the light of the world. A city thatis set on an hill cannot be hid. Neither do men light a candle, and put itunder a bushel, but on a candlestick; and it giveth light unto allthat are in the house. Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven.--Matthew 5:14-16President Harold B. Lee was recognized by church members as a dynamic speaker whose love for and understanding of the gospel of Jesus Christ was always evident in his actions and words. Ye Are the Light of the World, a companion volume to Stand Ye in Holy Places, brings together more of the powerful sermons and writings of this prophet of God. He speaks about the power of example and the need for the saints to be united in their faith, to do the right things for the right reasons, to always be a light and example to the world. He talks about love, family and the home, with special messages to youth to guide them in their dating and courtship. He gives commonsense advice for parents with special emphasis on keeping the family together through regular family home evenings. He speaks of all aspects of life for active church members, finally bearing powerful testimony to the divinity of the Savior and continuing revelation in the latter days. May all who read this powerful book listen to the wisdom of this beloved leader to continue to stand in holy places and always be a light unto the world.

Gerald Massay was one of the first Egyptologists in modern times to realize that with the final eclipse of the incredibly old Land of Kam (a.k.a ancient Egypt), a light had been extinguished in world civilization. He was a man of protean interests and concerns - at once a poet, socialist, Shakespearean scholar, mythographer and Egyptologist. Part of his genius was the ability to look truth in the face and not flinch. Massey did in the cultural domain what modern paleontologists have done in the anthropological: pinpoint Africa as the crucible of humanity’s story. In the first volume of Ancient Egypt, Massey was primarily concerned with elaborating how the first humans emergine in Africa created thought. What had been evident to him from the outset was that the myths, rituals and religions of ancient Egypt - or Old Kam - had preserved virtually intact a record of the psychomythic evolution of humanity. In the second volume, Massey examines the celestial phenomenon known as the Precession of the Equinoxes. He believed only by understanding this phenomenon was it possible to fathom Nile Valley history. He provides the reader with extensive detail on the interconnection of the two. The last half of the second volume is devoted to the Kamite sources of Christianity. Massey demonstrated the manner in which New Testament Christianity evolved directly out of the Osirian mysteries. Massey pioneered the effort the connect Old Kamite thought to its origin in Africa’s antiquity. His conclusions, which are constantly being verified, showed that Kamite thought was the direct progenitor to the philosophy, metaphysics, religion and science that eventually shaped Western civilization. -- from back cover.
