"The universe doesn't give you what you ask for with your thoughts - it gives you what you demand with your actions." Steve Maraboli, Life, the Truth, and Being Free tags: actions , change , inspirational , intent , motivational , success , thoughts , universe

Quote by Steve Maraboli: "The universe doesn't give you ...

Written with tongue planted firmly in cheek, "The Universe Doesn't Give A Flying F*** About You" is about what you should expect based on the title alone. It's a long blog entry from a person who rightly points out that all of the galactic stuff out there - the sun, planets, stars, galaxies and so on - don't care.

Amazon.com: Customer reviews: The Universe Doesn't Give a ...

Suicide is a free will action that you can take, so the universe wouldn't give you that because that is your choice. However, it can give you a situation that causes you to want to feel like committing suicide. But the feelings are your own. The universe doesn't force you to feel any way. It gives you a situation and you decipher how you feel.

I read this short book called "The Universe Doesn't Give a Flying Fuck About You" in my kindle last week. Here are few of the notes from the book. It's a quick read which gives a perspective about our inhibitions and reminds us about how small in this grad scale universe.

Why does the Universe Doesn't Give a Flying Fuck About You ...

The Universe is always trying to give you precisely what you want. But it can't, if you're not a match to it. And you don't have to "ask" using words.

Does The Universe Give Us What We Want Or What's Best For ...

Please don't misunderstand...the universe gives you a sign of YOUR energy. It doesn't have it's own opinion. So if you see yourself as strong, worthy and loved, that is the type of world you will create. I urge you to make a list of all the wonderful things about yourself. And then know, in the depth of your soul, that you are divine.

In her latest book, *The Universe Has Your Back*, New York Times best-selling author Gabrielle Bernstein teaches readers how to transform their fear into faith in order to live a divinely guided life. Each story and lesson in the book guides readers to release the blocks to what they most long for: happiness, security and clear direction. The lessons help readers relinquish the need to control so they can relax into a sense of certainty and freedom. Readers will learn to stop chasing life and truly live. Making the shift from fear to faith will give readers a sense of power in a world that all too often makes them feel utterly powerless. When the tragedies of the world seem overwhelming, this book will help guide them back to their true power. Gabrielle says, "My commitment with this book is to wake up as many people as possible to their connection to faith and joy. In that connection, we can be guided to our true purpose: to be love and spread love. These words can no longer be cute buzz phrases that we merely post on social media. Rather, these words must be our mission. The happiness, safety, and security we long for lies in our commitment to love." When readers follow this path, they'll begin to feel a swell of energy move through them. They will find strength when they are down, synchronicity and support when they're lost, safety in the face of uncertainty, and joy when they are otherwise in pain. Follow the secrets revealed in this book to unleash the presence of your power and know always that *The Universe Has Your Back*.

Planets, stars, and constellations feature prominently in this beautiful, original poetry collection from Lang Leav. Inspired by the wonders of the universe, the best-selling poetess writes about love and loss, hope and hurt, being lost and found. Lang's poetry encompasses the breadth of emotions we all experience and evokes universal feelings with her skillfully crafted words.

A New York Times Bestseller From the author of the New York Times bestseller *All the Bright Places* comes a heart-wrenching story about what it means to see someone—and love someone—for who they truly are. Everyone thinks they know Libby Strout, the girl once dubbed "America's Fattest Teen." But no one's taken the time to look past her weight to get to know who she really is. Following her mom's death, she's been picking up the pieces in the privacy of her home, dealing with her heartbroken father and her own grief. Now, Libby's ready for high school, for new friends, for love, and for EVERY POSSIBILITY LIFE HAS TO OFFER. In that moment, I know the part I want to play here at MVB High. I want to be the girl who can do anything. Everyone thinks they know Jack Mazzellin, too. Yes, he's got swagger, but he's also mastered the impossible art of giving people what they want, of fitting in. What no one knows is that Jack has a newly acquired secret: he can't recognize faces. Even his own brothers are strangers to him. He's the guy who can re-engineer and rebuild anything in new and bad-ass ways, but he can't understand what's going on with the inner workings of his brain. So he tells himself to play it cool. Be charming. Be hilarious. Don't get too close to anyone. Until he meets Libby. When the two get tangled up in a cruel high school game—which lands them in group counseling and community service—Libby and Jack are both pissed, and then surprised. Because the more time they spend together, the less alone they feel... Because sometimes when you meet someone, it changes the world, theirs and yours. Jennifer Niven delivers another poignant, exhilarating love story about finding that person who sees you for who you are—and seeing them right back. "Niven is adept at creating characters... [Libby's] courage and body-positivity make for a joyful reading experience." —*The New York Times* "Holding Up the Universe... taps into the universal need to be understood. To be wanted. And that's what makes it such a remarkable read." —*TeenVogue.com* "Why New Book Holding Up the Universe Is the Next *The Fault in Our Stars*" "Want a love story that will give you all the feels? ... You'll seriously melt!" —*Seventeen Magazine*

An astrophysicist presents an in-depth yet accessible tour of the universe for lay readers, while conveying the excitement of astronomy. How is a galaxy billions of lightyears away connected to us? Is our home nothing more than a tiny speck of blue in an ocean of night? In this exciting tour of a universe far larger than we can imagine, cosmologist Paul M. Sutter emphasizes how amazing it is that we are part of such a huge, complex, and mysterious place. Through metaphors and uncomplicated language, Sutter breathes life into the science of astrophysics, unveiling how particles, forces, and fields interplay to create the greatest of cosmic dramas. Touched with the author's characteristic breezy, conversational style—which has made him a breakout hit on venues such as *The Weather Channel*, *the Science Channel*, and his own popular *Ask a Spaceam!* podcast—he conveys the fun and wonder of delving deeply into the physical processes of the natural universe. He weaves together the past and future histories of our universe with grounded descriptions of essential modern-day physics as well as speculations based on the latest research in cosmology. Topics include our place in the Milky Way galaxy, the cosmic web—a vast web-like pattern in which galaxies are arranged; the origins of our universe in the big bang; the mysteries of dark matter and dark energy; how science has dramatically changed our relationship to the cosmos; conjectures about the future of reality as we know it; and more. For anyone who has ever stared at the starry night sky and wondered how we humans on Earth fit into the big picture, this book is an essential roadmap.

A psychiatrist presents a compelling argument for how human purpose and caring emerged in a spontaneous and unguided universe. Can there be purpose without God? This book is about how human purpose and caring, like consciousness and absolutely everything else in existence, could plausibly have emerged and evolved unguided, bottom-up, in a spontaneous universe. A random world—which according to all the scientific evidence and despite our intuitions is the actual world we live in—is too often misconstrued as nihilistic, demotivating, or devoid of morality and meaning. Drawing on years of wide-ranging, intensive clinical experience as a psychiatrist, and his own family experience with cancer, Dr. Lewis helps readers understand how people cope with random adversity without relying on supernatural belief. In fact, as he explains, although coming to terms with randomness is often frightening, it can be liberating and empowering too. Written for those who desire a scientifically sound yet humanistic view of the world, Lewis's book examines science's inroads into the big questions that occupy religion and philosophy. He shows how our sense of purpose and meaning is entangled with mistaken intuitions that events in our lives happen for some intended cosmic reason and that the universe itself has inherent purpose. Dispelling this illusion, and integrating the findings of numerous scientific fields, he shows how not only the universe, life, and consciousness but also purpose, morality, and meaning could, in fact, have emerged and evolved spontaneously and unguided. There is persuasive evidence that these qualities evolved naturally and without mystery, biologically and culturally, in humans as conscious, goal-directed social animals. While acknowledging the social and psychological value of progressive forms of religion, the author respectfully critiques even the most sophisticated theistic arguments for a purposeful universe. Instead, he offers an evidence-based, realistic yet optimistic and empathetic perspective. This book will help people to see the scientific worldview of an unguided, spontaneous universe as awe-inspiring and foundational to building a more compassionate society.

Conversations with the Universe: How the World Speaks to Us by Simran Singh is the wake up call that we all need in order to listen to and understand what the Universe is saying to us. These signs and signals are all around us, but often we are unable to translate them without a guide. Simran has made it her life's work to help us to become aware of the language of the Universe so we don't miss out on much of the beauty and richness of our experience. Simran is a wonderful storyteller and she takes her message of consciousness to unexpected places, such as her spiritual stand-up comedy and humorous writing. Her light engaging voice paints a colorful picture as she advocates for us to expand our awareness of the signs that the Universe places clearly before us as it helps to guide us down the right path. Simran Singh is a visionary, spiritual healer. She is the publisher of the *Nautilus Award* Winning 11:11 Magazine, the only publication to given this distinguished honor. She also is the host of 11:11 Talk Radio, which is the #1 rated program on the largest online radio network, Voice America 7th Wave. *Conversations with the Universe* is a life changing book that delivers all the wit and wisdom of this amazing and unpredictable woman.

Just Ask the Universe is not a book of New Age gobbledegook filled with empty promises. Angels won't fly from above and touch you while you're reading. You will not be asked to practice unusual or tedious rituals. There will be no preaching or sage advice and there will most certainly be no channeling of your inner chakras or dressing like Friar Tuck. Just Ask the Universe is a realistic guide to personal development. By creating a blueprint for self-growth and commanding your subconscious mind, the Universe will manifest all your dreams. For over two decades, Michael Samuels has studied and methodically tested hundreds of books on self-improvement, spirituality, and the metaphysical. Just Ask the Universe accumulates the wisdom from "thought teachers" like Wallace Wattles, Anthony Robbins, Rhonda Byrne, Joseph Murphy, Robert Collier, and Napoleon Hill, and compiles it under one unified lesson: if your thoughts are clear and in harmony with your mind and the truth of your surroundings, your life can be filled with all the richness the Universe has to offer. As a culmination from these teachings, Michael will show you how to use simple and fun techniques to create a more desirable future. This approach, coupled with real-life stories, will teach you how to achieve personal power to overcome any barrier. Regardless of what your present circumstances might be, by following the principles in this book, you will be able to gain power over your destiny. The Universe is listening. All you have to do is just ask.

Perfect for fans of *The Wonderful Things You Will Be* and *That's Me Loving You*, this picture book by a renowned astrophysicist is a lyrical meditation on the preciousness of one child and the vastness of the universe. Just like the sun gives shine to the moon, you light up the world beyond this room... You are grand and marvelous, strong and mysterious. The history of the world is in your fingertips. A lyrical meditation on the preciousness of one child and the vastness of the universe, this gorgeously illustrated picture book shares the immensity of a parent's love along with the message that we are all connected to the broader cosmos in important and intimate ways. A perfect bedtime read-aloud, *Child of the Universe* is a book to cherish forever. The author is an astrophysicist who has been fascinated by the universe since he was a child. As a parent, he has developed a new appreciation for the deep connections between billions of years of cosmic evolution and this one tiny human.

This #ownvoices debut about losing and finding family, forging unlikely friendships, and searching for answers to big questions will resonate with fans of Erin Entrada Kelly and Rebecca Stead. The only thing Rosalind Ling Geraghty loves more than watching NASA launches with her dad is building rockets with him. When he dies unexpectedly, all Ro has left of him is an unfinished model rocket they had been working on together. Benjamin Burns doesn't like science, but he can't get enough of *Spacebound*, a popular comic book series. When he finds a sketch that suggests that his dad created the comics, he's thrilled. Too bad his dad walked out years ago, and Benji has no way to contact him. Though Ro and Benji were only supposed to be science class partners, the pair become unlikely friends: Benji helps Ro finish her rocket, and Ro figures out a way to reunite Benji and his dad. But Benji hesitates, which infuriates Ro. Doesn't he realize how much Ro wishes she could be in his place? As the two face bullying, grief, and their own differences, Benji and Ro must try to piece together clues to some of the biggest questions in the universe.
