This was proven to me. Keep in mind that a 20-star/object alignment takes about 30 minutes. Calculations for star alignment are based on the most reliable two stars or objects that you have chosen. From the Vixen ' s performance that evening, I believe two stars will have you pointing and tracking acceptably.

This book is for anyone who owns, or is thinking of owning, a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech, computer-driven, Go-To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system, with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface, first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward, and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go-To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.

This book serves as a comprehensive guide for using a Nexstar Evolution mount with WiFi SkyPortal control, walking the reader through the process for aligning and operating the system from a tablet or smartphone. The next generation Go-To mount from Celestron, this is compatible not only with the Nextstar Evolution but also with older mounts. It is the ideal resource for anyone who owns, or is thinking of owning, a Nexstar Evolution telescope, or adapting their existing Celestron mount. Pros and cons of the system are thoroughly covered with a critical depth that addresses any possible question by users. Beginning with a brief history of Go-To telescopes and the genesis of this still new technology, the author covers every aspect of the newly expanding capability in observing. This includes the associated Sky Portal smartphone and tablet application, the transition from the original Nexstar GoTo system to the new SkyPortal system, the use of the Sky Portal application with its Sky Safari 4 basic software and Celestron WiFi adaptations, and discussions on the use of SkyPortal application using the Celestron adapter on older Celestron mounts. Comments and recommendations for equipment enable the reader to successfully use and appreciate the new WiFi capability without becoming overwhelmed. Extensively illustrated using actual screenshots from the program interface, this is the only guide to the Nextstar SkyPortal an observer will need.

This book is for the aging amateur astronomy population, including newcomers to astronomy in their retirement and hobbyists who loved peering through a telescope as a child. Whether a novice or an experienced observer, the practice of astronomy differs over the years. This guide will extend the enjoyment of astronomy well into the Golden Years by addressing topics such as eye and overall health issues, recommendations on telescope equipment, and astronomy-related social activities especially suited for seniors. Many Baby-Boomers reaching retirement age are seeking new activities, and amateur astronomy is a perfect fit as a leisure time activity. Established backyard astronomers who began their love of astronomy in their youth, meanwhile, may face many physical and mental challenges in continuing their lifelong hobby as they age beyond their 55th birthdays. That perfect telescope purchased when they were thirty years old now suddenly at sixty years old feels like an immovable object in the living room. The 20/20 eyesight has given way to reading glasses or bifocals. Treasured eyepieces feel all wrong. Growing old is a natural process of life, but astronomy is timeless. With a little knowledge and some lifestyle adjustments, older astronomers can still enjoy backyard observing well into their seventies, eighties and even into their nineties.

Since she exploded on the scene with her two juicy and impossible-to-put-down tell-alls, readers have wanted to know even more about what makes Karrine Steffans tick. How was she able to meet all the high profile politicians, movie stars, and other celebrities that are her close acquaintances? What skills does she possess to keep men wanting more? Finally, Karrine lays it all out and explains exactly what a woman must do to win over the man of her dreams. With chapters like "Never Let Him See You Sweat," "Flirting," "Encouraging His Manhood," and "Give Him What He Wants," this hot and sexy manual is a must-have for every woman's bookshelf.

Part tell-all, part cautionary tale, this emotionally charged memoir from a former video vixen nicknamed 'Superhead' goes beyond the glamour of celebrity to reveal the inner workings of the hip-hop dancer industry—from the physical and emotional abuse that's rampant in the industry, and which marked her own life—to the excessive use of drugs, sex and bling. Once the sought-after video girl, this sexy siren has helped multi-platinum artists, such as Jay-Z, R. Kelly and LL Cool J, sell millions of albums with her sensual dancing. In a word, Karrine was H-O-T. So hot that she made as much as \$2500 a day in videos and was selected by well-known film director F. Gary Gray to co-star in his film, A Man Apart, starring Vin Diesel. But the film and music video sets, swanky Hollywood and New York restaurants and trysts with the celebrities featured in the pages of People and In Touch magazines only touches the surface of Karrine Steffans' life. Her journey is filled with physical abuse, rape, drug and alcohol abuse, homelessness and single motherhood—all by the age of 26. By sharing her story, Steffans hopes to shed light on an otherwise romanticised industry and help young women avoid the same pitfalls she encountered. If they're already in danger, she hopes to inspire them to find a way to dig themselves out of what she knows first-hand to be a cycle of hopelessness and despair.

Raven De Winter: loner, loser, poet with a razor blade, trapped in a tormented relationship for the sake of his young son. Pegasus Belmont: melancholy dreamer, haunted by the smile of his dead mother, silver wings tattooed on his shoulder blades like a wish.
