Cutting Question

THEORY OF METAL

CUTTING . 1. Define

Metal Cutting . Metal

cutting or machining

is the process of by

removing unwanted

Download Free Theory Of Metal

material from a block of metal in the form of chips. 2. What are the important characteristics of materials used for cutting tools? High red hardness High wear resistance . Low frictional co- efficient

dimensional cutting).

13. Define orthogonal and oblique cutting?

Orthogonal cutting

:-The cutting edge of tool is perpendicular to the work piece axis.

CHIP FORMATION

Tool will cut or shear off the metal, provided

1. Tool is harder than the work metal.
2. Tool is properly shaped so that its edge can be effective in cutting the metal.
3. The tool is strong enough to

cutting process that has been extensively studied for the past half century.

However, despite all the effort that has been expended, it is still not possible to predict the performance of a cutting tool based on the geometry and kinematics of the system and basic material properties.
