Chapter 23 Summary. Vasco Da Gama's voyage to India had opened the way to the East for Europeans, but its initial impact was greater for Europe than for Asia. Europeans had little to offer Asians in exchange for their desired products. Asians were not interested in converting to Christianity, and their states were too strong to be conquered.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The

authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Two major dividing lines have formed the megastructure of Eurasia, determining the historical epochs of the continent's peoples. The first, vertical (longitudinal) line has separated East and West since the Paleolithic Age. The East was dominated by Mongol peoples speaking Sino-Tibetan, Manchu-Tungus, and Altaic languages. The Caucasoid peoples of the West spoke mostly Indo-European, Semite, and Finno-Ugric languages. The second line divided the continent horizontally (by latitude) into North and South. This division was closely connected with the Eurasian Steppe Belt. To the north of it lay the world of hunter-gatherers and fishermen. To the south, settled agriculture was dominant. The Steppe Belt itself was the domain of pastoralists, the nomadic and semi-nomadic herders. These lines converged at the entrance to the Great Silk Road. With the swift development of horse domestication and horseback riding, the nomads moved--from the Early Metal Age (500-400 BCE) to Genghis Khan's and the Genghisid's Great Empire (1200-1400 CE)--to the forefront of Eurasian history as their world became increasingly involved in dramatic and sometimes tragic relationships with their southern neighbors. This book focuses on the tangle of problems in these nomadic peoples' history.

The Public Health Foundation (PHF) in partnership with the Centers for Disease Control and Prevention (CDC) is pleased to announce the availability of Epidemiology and Prevention of Vaccine-Preventable Diseases, 13th Edition or "The Pink Book" E-Book. This resource provides the most current, comprehensive, and credible information on vaccine-preventable diseases, and contains updated content on immunization and vaccine information for public health practitioners, healthcare providers, health educators, pharmacists, nurses, and others involved in administering vaccines. "The Pink Book E-Book" allows you, your staff, and others to have quick access to features such as keyword search and chapter links. Online schedules and sources can also be accessed directly through e-readers with internet access. Current, credible, and comprehensive, "The Pink Book E-Book" contains information on each vaccine-preventable disease and delivers immunization providers with the latest information on:

- Principles of vaccination
- General recommendations on immunization
- Vaccine safety
- Child/adult immunization schedules
- International vaccines/Foreign language terms
- Vaccination data and statistics

The E-Book format contains all of the information and updates that are in the print version, including:

- New vaccine administration chapter
- New recommendations regarding selection of storage units and temperature monitoring tools
- New recommendations for vaccine transport
- Updated information on available influenza vaccine products
- Use of Tdap in pregnancy
- Use of Tdap in persons 65 years of age or older
- Use of PCV13 and PPSV23 in adults with

immunocompromising conditions · New licensure information for varicella-zoster immune globulin Contact bookstore@phf.org for more information. For more news and specials on immunization and vaccines visit the Pink Book's Facebook fan page

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

From the award-winning and bestselling author of *Cod* comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured – all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth's rock fairly close to the surface. From pre-history until just a century ago – when the mysteries of salt were revealed by modern chemistry and geology – no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world's sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans' insatiable demand. As he did in his highly acclaimed *Cod*, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.

Glencoe World History is a full-survey world history program authored by a world-renowned historian, Jackson Spielvogel, and the National Geographic Society. Experiencing world history and understanding its relevance to the modern world is the goal of this program. The program addresses the importance of motivating students and engaging them in meaningful learning - learning that links the past with issues confronting young people today. Glencoe World History addresses student learning on many levels and encourages the reader to become actively involved with the beautifully presented content.

Ways of the World is one of the most successful and innovative textbooks for world history. The brief-by-design narrative is truly global and focuses on significant historical trends, themes, and developments in world history. Authors Robert W. Strayer, a pioneer in the world history movement with years of classroom experience, along with new co-author Eric W. Nelson, a popular and skilled teacher, provide a thoughtful and insightful synthesis that helps students see the big picture while teaching students to consider the evidence the way historians do.
